

ikohe

Ikoho a trusted name in Jewelry Crafting Techniques offers you an innovative line of Tools, Supplies and Equipment to transform your visions into contemporary or traditional art forms. We are delighted to present our comprehensive catalog with dedicated sections that feature a concise listing of pictorially illustrated products. With years of experience, we have become a primary supplier to the needs of metalsmiths in the industry. To meet the challenges of modern day techniques our range of selected professional tools covers all aspects of jewelry making, wax carving, casting, raising, forming, sculpting, setting, finishing and more..... Over the years, we've built a reputation for on-time delivery, competitive pricing and quality tested products to satisfy the demanding needs of distributors and professional jewelers. Today, we're better prepared than ever to meet the growing needs of global markets that have changed over the years. When you think of quality with value - Think IKOHE.

1. 3M[®] Wet or Dry Coated Abrasive Sheets

- · Silicon Carbide, resin bonded to a soft paper backing
- · May be used wet or dry

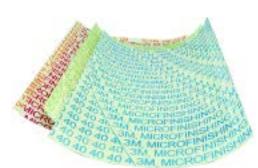

Tri-mite Pk/50

| ITEM # | SIZE | GRIT |
|---------|----------|------|
| 21-1011 | 9" X 11" | 180 |
| 21-1012 | 9" X 11" | 220 |
| 21-1013 | 9" X 11" | 320 |
| 21-1014 | 9" X 11" | 400 |
| 21-1015 | 9" X 11" | 600 |
| | | |

- · Wear resistant and waterproof
- The higher the number the finer the grit

Imperial Pk/50

| ITEM # | SIZE | GRIT |
|---------|----------|------|
| 21-1016 | 9" X 11" | 800 |
| 21-1017 | 9" X 11" | 1000 |
| 21-1018 | 9" X 11" | 1200 |
| 21-1019 | 9" X 11" | 1500 |
| 21-1020 | 9" X 11" | 2000 |
| 21-1021 | 9" X 11" | 2500 |

2. 3M[®] Micro-Finishing Film Sheets

- · Superior micron graded aluminum oxide
- · Prepares surface for finishing prior to buffing Pk/50

| ITEM# | SIZE | MIC | |
|---------|-------------|-----|--|
| 21-1031 | 81/2" X 11" | 60 | |
| 21-1032 | 81/2" X 11" | 40 | |
| 21-1033 | 81b" X 11" | 30 | |

- · Fine film backing is durable and long lasting
- The lower the number the finer the grit

| ITEM # | SIZE | MIC | |
|---------|-------------|-----|--|
| 21-1034 | 81/2" X 11" | 15 | |
| 21-1035 | 81/2" X 11" | 9 | |

3. 3M® Platinum Fre-Cut Abrasive Sheets

- Micron graded paper for pre-polishing platinum
- Fre-Cut silicon carbide abrasive sheets

· Use dry only Pk/100

| ITEM# | SIZE | GRIT |
|---------|----------|------|
| 21-1041 | 9" X 11" | 360 |
| 21-1042 | 9" X 11" | 400 |
| 21-1043 | 9" X 11" | 500 |

4. 3M® Wet or Dry Polishing Paper

- Pliable, non-woven, lint free backing Coated with micron sized abrasives
- · May be used moist or dry

| ITEM # | SIZE | MIC | |
|---------|---------------------------------------|-----|--|
| 21-1051 | 8 ¹ / ₂ " X 11" | 30 | |
| 21-1052 | 81/2" X 11" | 15 | |
| 21-1053 | 81/2" X 11" | 9 | |
| 21-1054 | 81/2" X 11" | 3 | |
| 21-1055 | 8 ¹ / ₂ " X 11" | 2 | |
| 21-1056 | 81/2" X 11" | 1 | |
| | | | |

5. 3M° PSA Sanding Discs

- Pressure sensitive backed silicon carbide discs
- · For pre-finishing non-ferrous and precious metals
- · Use wet or dry
- Must be used with 6" Ø flat flange

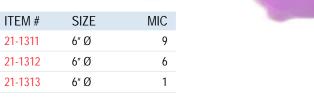

| ITEM# | SIZE | GRIT |
|---------|------|------|
| 21-1301 | 6" Ø | 240 |
| 21-1302 | 6" Ø | 400 |
| 21-1303 | 6" Ø | 600 |

6. 3M® PSA Diamond Lapping Discs

- · Consistent graded diamond on a pressure sensitive disc
- · Lubricate with water to increase cutting
- · Always mount on a 6" Ø flat flange
- Max. speed 3,000 rpm

| ITEM# | SIZE | MIC |
|---------|------|-----|
| 21-1311 | 6" Ø | 9 |
| 21-1312 | 6" Ø | 6 |
| 21-1313 | 6" Ø | 1 |

7. 3M* PSA Micro-Finishing Discs

- Superior graded aluminum oxide pressure sensitive discs
- Must be used with a 6" aluminum back plate Pk/25

| ITEM # | SIZE | MIC |
|---------|------|-----|
| 21-1321 | 6" Ø | 60 |
| 21-1322 | 6" Ø | 30 |
| 21-1323 | 6" Ø | 15 |
| 21-1324 | 6" Ø | 9 |

- Ensures consistent surface finish
- · Max. speed 3,000 rpm.

Nolf Belt Sander See page# 44

27. 3M® Imperial Micro-finishing Film 372L

A high-strength polyester film backing is coated with premium, micron-graded mineral particles that are electrostatically oriented for greater cutting efficiency, and resin-bonded for increased durability. The result: a fast cutting abrasive that provides precise, consistently uniform, close tolerance finishes. Use moderate to light pressure. Bur Lube can be used as a lubricant and coolant. Belts are 1" x 10½" long.

| 21-1757 | 15µ | 600 |
| 21-1758 | 9µ | 1200 |

APPLICATION
Metal, plastic, fiberglass, solid-surface composites and wood. Product can be run Wet or Dry.

28. 3M® Diamond Micro-finishing Film 675L

Provides the unique flexibility of film and the consistency of micron graded diamonds. You may find you will be able to start with a finer grade than normally used because of its more aggressive cut rate.

Use water or Bur Lube, which will extend the life of the abrasive. Use moderate to light pressure.

Belts are 1" x 101/2" long.

AH: Arbor Hole

• Specially formulated, cushioned action performance on precious metals

21-1921 Style #707

Style #707: 44 wheels and 2 mandrels in a four compartment plastic box.

Wheels are equally assorted in all four grit textures.

21-1922 Style #767

Style #767: 40 points and 4 mandrels in a four compartment plastic box.

Points are equally assorted in all four grit textures.

21-1925 Style #777

Style #777: 80 small wheels and points in popular sizes and grits.

Comes with four mandrels and $\mbox{\it 5}\mbox{\it h}^{\mbox{\tiny 1}}$ to 1" sizes of $\mbox{\it wheels}$ and points

in clear divided box.

21-1926 Style #778

Style #778: 64 points and cylinders, 2 each of all eight shapes in each of the

4 grits and 4 each 1/8" shank mandrel.

21-1927 Style #779

Style #779: 45 wheels and 2 mandrels in a four compartment plastic box. Wheels are equally assorted in all four grit textures.

The Advantage of Ceramic

Glass Fiber Polishers

for stone set jewelry

Fiber Section

Even fiber diameter

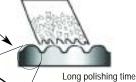

Short polishing time

84. Ceraton- Ceramic Glass Fiber Polishers- Japan

- Unique, superb polishing innovation Combines ceramic and glass fibers in a thermosetting resin
- Versatile applications for jewelry, gold, silver, platinum and precious metal alloys
- Useful for polishing jewelry with set stones Size Ø X L (2.35 X 50mm) Speed 10,000- max 20,000 rpm

Ceraton Polishing Minimum scratching or cracking of object surface Waste of material during polishing is less

Grinding Grit Uneven grinding particles

Natural Silk with 1 Needle 2m

2. Polyamid (NYLON) Bead Cord- Carded

Polymide thread is stronger than "Natural Silk". Under tension it stretches but returns to its original dimensions when released. This is advantageous as it allows you to precisely position the knots.

Available on card with needle - 6.5 ft (2M) of thread. Each pack contains 5 individual cards.

8. Soft Flex® Beading Wire

The designers choice in bead stringing materials! Soft Flex wire is brought to you by a state of the art micro-wire technology. It is the most flexible, knittable stainless steel wire designed to handle all levels of abrasion, everything from soft materials like pearls and seed beads to rougher materials like glass, minerals and metal. A range of vibrant colors to open up a whole new world for designers.

Available in spools of three diameters and two lengths.

0.014 Ø (21 strand) Use with softer, less abrasive materials, pearls and seed beads.
0.019 Ø (49 strand) Ideal for use with glass beads, Austrian crystals, silver and pewter.
0.024 Ø (49 strand) Great for use multi-standard designs, African beads and large stones.

9. Soft Touch™ Silver

Soft touch is once again redefining flexibility. Constructed from micro-woven stainless steel wire strands it offers 50% more suppleness, more life and movement to your jewelry designs. Eliminate the frustrating task of re-stringing due to cutting and breakage by selecting the appropriate wire diameter. The thicker the wire the better resistance it will have against breakage.

Available in spools of 30 ft and 100 ft.

| Spools | 30 ft | | | 100 ft | | |

| 22-0051 | CRIMP F/TOOL 0.14-0.15" |
| 22-0052 | CRIMP F/TOOL 0.18-0.19" |

21. Plastic Organizers

Clear hinged storage container with fixed compartments to organize beads and findings.

| ITEM# | DIMENSIONS |
|---------|-----------------|
| 22-0071 | 7" X 3½" X 1½" |
| 22-0072 | 11" X 6¾" X 1¾" |

BOOKS

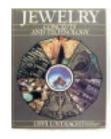

The Design and Creation

of Jewelry

by Robert Von Neumann

A complete reference guide showing traditional and contemporary methods and materials of jewelry making. Learn basic and specialized metalworking, shaping and decorative techniques. Covers cutting, stamping, pickling, coloring, polishing and design transfer methods.

61-1011 (Softcover - 321 pages)

6. Jewelry

Concepts and Technology

by Oppi Untracht

The most thorough reference book available on traditional and innovative jewelry-making techniques. Features contemporary works from over 300 jewelers. 900 photos, 377 illustrations, step-by-step instructions, comprehensive glossary and a detailed index. A must-have book.

61-1016 (Hardcover - 840 pages)

2. How to Create Settings

In Metal Wire and Wax

by Adolfo Mattiello

Contains over 250 diagrams for creating settings in metal, wire and wax. Well-illustrated, detailed directions guide you through the procedures of various settings including regular wire settings, slim-line wire settings, wax settings, special wax settings and joining settings to form a cluster.

61-1012 (Softcover - 33 pages)

7. The Jeweler's Art

by Alice Sprintzen

This book is designed as a working notebook for recording your discoveries, triumphs and corrections, for future reference. Explores design possibilities, hand tools, metals, sawing, filing, forming, soldering hinges and catches, finishing and buffing, stone setting and gem stones. Detailed step-by-step black & white line art instruction included.

61-1021 (Hardcover - 132 pages)

Techniques of Jewelry Illustration

and Color Rendering

by Adolfo Mattiello

Beautifully illustrated guide to jewelry rendering. Some of the best jewelry designers in the field explain and demonstrate the illustration process.

61-1013 (Hardcover - 152 pages)

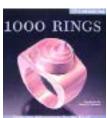

8. Jewelry:

Contemporary Design and Technique

by Chuck Evans

Solid introduction to creating handmade jewelry and other metal objects. Clear demonstrations of over 65 metalworking techniques. 365 photos and illustrations. Learn standard techniques, as well as specialized tasks including anodizing aluminum and titanium.

61-1018 (Hardcover - 267 pages)

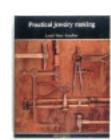

4. 1000 Rings - Inspiring

Adornments for the Hand

A truly exquisite collection of color photographs of each of the ring designs along with comments of top artists working in the field. Some of the rings are constructed of conventional jewelry making material while others use unorthodox components.

Many incorporate humour and surprise.

61-1014 (Softcover - 416 pages)

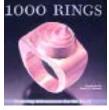

9. Practical Jewelry Making

by Loosli/Merz/Schaffner

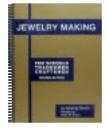

A comprehensive book providing practical, instructional knowledge for proficiency in the jewelry trade. Extensive coverage of basic operations including filing, sawing, soldering and drilling. Complex forming, assembling, setting and finishing operations are also covered.

61-1019 (Hardcover - 164 pages)

5. Jewelry Making For Schools,

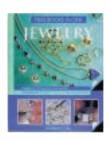

Tradesmen, Craftsmen (Revised Edition)

by Murray Bovin; Revised by Peter M. Bovin

A comprehensive, well-illustrated, easy-to-follow reference guide for the beginner and advanced craftsman. Covers practical and contemporary methods of jewelry making such as casting, stone setting, jewelry construction and decorative processes.

61-1015 (Spiralbound - 288 pages)

10. Jewelry – Two Books in One

by Madeline Coles

A unique instructional book with die-cut pages devoted to 23 outstanding projects. The top of each page illustrates each project and the bottom of each page discusses the appropriate techniques required to complete your work. Explanations of 20 techniques including cutting, sawing, drilling, filing, polishing, soldering, wire twisting, mitering, stone setting and more.

61-1020 (Hardcover-128 pages)

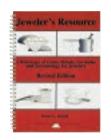

11. Jeweler's Resource

by Bruce G. Knuth

A practical tool for the bench jeweler, student and retail jeweler. Easy-to-follow text and illustrations. Contains an extensive list of gems and gem properties; diagrams of gem-cutting styles; legal standards for diamond, gold and silver marketing; formulas and chemical preparations; and measurement conversion and comparison tables.

61-1031 (Spiral bound - 112 pages)

16. The Rings Book

by Jinks Mcgarth

Everything you need to know about the history of rings. All about the properties of metal, the tools to use, as well as the various processes, shaping, annealing, soldering and decorating.

61-1041 (Softbound 128 pages)

12. The Jeweler's Bench Reference

by Harold O'Connor

A handy pocket-size reference guide that explains all types of jewelry making techniques. Vital information on fabricating, soldering, stone-setting, plating and casting.

61-1032 (Spiral bound - 68 pages)

17. The Creative Jeweler

by S. McSwiney, P. Williams, C. Davies & J. Davies

A full color book with projects on earrings, bangles, brooches, necklaces and various other articles of jewelry. Lists a range of equipment and materials that are needed for this creative art form.

61-1042 (Softbound 160 pages)

13. The Flexible Shaft Machine

by Harold O'Connor

A quick reference guide that helps you save time and increase efficiency. Details the various abrasives and their uses. Includes illustrations and a chart on bur sizes.

61-1033 (Softcover - 47 pages)

18. Jewelry Making Techniques Book

by Elizabeth Olver

A comprehensive guide to jewelry making. Full color photographs which explain each of the techniques. Contains vital information on metal forming, casting and finishing.

61-1043 (Softbound 116 pages)

14. At the Bench:

A Guide to Working with Gold & Silver

by Gregg Todd and Greg Gilman

An illustrated resource book on how to fabricate gold and silver jewelry. Step-by-step instructions with over 200 photographs and illustrations. A very useful book to upgrade your skill level.

61-1034 (Softbound 116 pages)

19. Basic Jewelry

Making Techniques

by Jinks Mcgarth

Learn the basics as well as the advanced techniques of jewelry making. Contains suggestions for planning a workshop. Includes step-by-step lessons to develop your skills.

61-1044 (Softbound 112 pages)

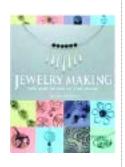

15. Jewelry Making:

Tips and Tricks of the Trade

by Stephen O'keefe

A beginners manual with ideas for the professional as well. More than 30 projects with photographic illustrations and step-by-step instructions. Teaches the basics of jewelry making and how to avoid common problems.

61-1035 (Softbound 128 pages)

20. Jewelry Wax Modeling

by Adolfo Mattiello

Learn how to effectively use carving wax to express your ideas and create harmonious designs. Jewelry modeling techniques are presented with progressive step-by-step instructions and drawings of each model. Contains practical information on tools and stone setting, as well as creating your own templates. Provides answers to frequently asked questions.

61-1051 (Hardcover - 161 pages)

BOOKS

21. Basic Wax Modeling

by Hiroshi Tsuyuki

This book illustrates how practical wax modeling is for designing jewelry. Presents 11 basic projects designed to teach the use of tools and types of waxes in the design and creation of wax models. Step-by-step photos, descriptions, sketches and notes demonstrate the processes of each project. Offers a number of sketches suggesting design possibilities.

61-1052 (Hardcover - 164 pages)

26. The Complete Metalsmith

by Tim McCreight

A handy bench reference that clearly explains shaping, forging, raising, mechanisms, casting and reticulation. This easy-to-use book describes everything from the use of tools to metals and their properties.

61-1071 (Spiralbound - 150 pages)

22. Practical Wax Modeling

Advanced Techniques for Wax Modelers

by Hiroshi Tsuyuki and Yoko Oba

The companion text to "Basic Wax Modeling" with detailed instructions and photos of each technique. Covers soft and hard wax modeling techniques, combinations of waxes, mitsuro and its uses, a variety of textures and methods of finishing castings. Helpful for experienced wax workers and as an addition to "Basic Wax Modeling."

61-1053 (Hardcover - 154 pages)

27. Silversmithing and Art Metal

For Schools, Tradesmen, Craftsmen (Revised Edition)

by Murray Bovin; Revised by Peter M. Bovin

An excellent project-oriented book for silversmiths. Contains the latest metal techniques including forming, constructing and decorating. Easy-to-follow instructions with over 300 illustrations.

61-1072 (Softcover - 176 pages)

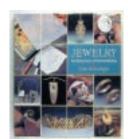

23. Practical Casting:

A Studio Reference

by Tim McCreight

A handy reference for jewelers, metalsmiths and sculptors. Covers many different techniques including model-making, spruing, investing, as well as vacuum, centrifugal and sand casting.

61-1061 (Spiral bound - 152 pages)

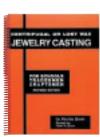

28. Jewelry: Fundamentals of Metalsmithing

by Tim McCreight

Clear and insightful instruction on jewelry making methods for the beginner or intermediate metalsmith. Features various techniques including fabricating, surface treatments, joining, finishing, stone setting, chain making, mechanisms and casting. Color photos of finished pieces are used to demonstrate each technique.

61-1073 (Hardcover - 143 pages)

24. Centrifugal or Lost Wax Jewelry

Casting (Revised Edition)

by Murray Bovin; Revised by Peter M. Bovin

This how-to book, detailing the elements of centrifugal casting (lost wax method), is a must for beginners and professionals. Thorough explanations on waxes, model making, investing, burnout and casting. This revised edition covers the latest techniques and equipment. Useful information on white metal casting and gold refining. Includes photos of work in progress.

61-1062 (Spiral bound - 143 pages)

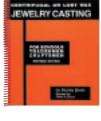

29. Silversmithing

by Rupert Finegold & William Seitz

An excellent instructional manual that enables you to translate your jewelry designs into metal by raising, sinking, forging, stretching, fabricating, or casting. Contains more than 700 photos and drawings.

61-1074 (Hardcover - 460 pages)

25. The Complete Handbook of

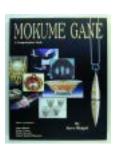

Centrifugal Casting

by Philip Romanoff

One of the best books on casting. In depth details on mold making, spin and centrifugal casting. Teaches you to make prototypes, as well as production castings. Illustrated with detailed drawings.

61-1063 (Softcover - 256 pages)

30. Mokume Gane

A Comprehensive Study

by Steve Midgett

Provides solid information about the process of mokume gane (wood grain metal). Each technique is thoroughly covered with tips from the finest makers in the world. Includes step-by-step instructions, information on metal compatibility and firing temperatures. Over 150 color photos including 25 pages of mokume gane art by accomplished masters. 61-1075 (Hardcover - 160 pages)

31. Form Emphasis for Metalsmiths

by Heikki Seppa

An advanced manual on the techniques of metalsmithing. Teaches you how to craft metal in terms of pure form. Discusses all the aspects of metal raising, sinking, stretching and fabricating. Includes an illustrated glossary.

61-1076 (Softbound - 146 pages)

36. The Art of Engraving

by James B. Meek

A complete authoritative introduction to the art of gun engraving. Contains step-by-step instructions, technical information, designs and layouts to complete each project. Over 1,400 photos, drawings and designs.

BELT SANDER

23-1151

26. Wolf's Belt Sander

This compact and convenient belt sander is ideal for sprue grinding, model making and bench work. It is powered by a flex shaft and easily attaches with the guick change collar. Clamps to the workbench and positions to any angle. Easy belt changing and tensioning. Uses 1" x 101/2" belts. Optional GRS BenchMate attachment fits into pivoting BenchMate collar. Unit includes five belts of assorted grits.

Set Includes: Belt sander with quick connect (without flexshaft), table clamp with universal attachment five assorted sanding belts (80, 120, 150, 240, 320) Instruction manual.

Adapter for GRS BenchMate

The optional GRS adapter 23-1152 (not included) fits into the GRS pivoting BenchMate collar (not included). This allows for the easiest, infinite angle positioning and rotation to work in between the rollers.

| ITEM# | DESCRIPTION |
|---------|---------------------------|
| 23-1151 | BELT SANDER |
| 23-1152 | ADAPTER FOR GRS BENCHMATE |

3M® Sanding Belts

3M® Sanding belts: "XODust ", Trizact™, Imperial™ Microfinishing film and Diamond in a wide variety of grits are available. See page #7

BELT SANDING APPLICATIONS Graver and chisel sharpening, metal finishing (gold, silver, brass, copper, platinum, stainless steel). Good for finishing wood, plastics, enamel and fiberglass.

27. Screwplates with Taps

Three different ranges to form internal or external fine pitch threads for nuts or screws. May also be used to rectify and repair damaged threads.

| ITEM # | DESCRIPTION |

New molded wheel technology for applying semi- and final finishes on platinum, gold, titanium, precious metal, clay, brass, cobalt and chrome.

41. 3M * FX Polishing Wheels - May be run wet or dry

- A comfortable wheel for final finishing of precious metals
- · Excellent for semi and final finishes on platinum and titanium

49. Satiner-Compound for Satin Finish

Achieve a satin finish by buffing. Use this greaseless compound that combines a blend of fine abrasive in a water soluble bond. Apply across the face of a loose cloth buff. Allow the buff to spin for about 50 secs. untill the satiner hardens. Polish the article for a satin finish.

A: Tight weave 86/80 treated muslin buffs B: Dense weave 80/80 buffs C: Compressed felt ply buffs D: Unsewn loose weave muslin buffs

Characteristics of Buffs and Compounds

The right buff with a compatable polishing compound can increase production rates, reduce unit cost and generate a superior finish. Koyo polishing compounds can perform better with a low polishing pressure and high speed revolution. This extends the life of buffs so that a high efficiency of stability and quality can be obtained.

Peripheral Speed of Buffs

Chemically treated buffs exhibit a better performance than untreated buffs when they are used at lower speeds. Tightly woven buffs are recommended for cutting and pre-polishing. Medium to high speeds with loosely woven buffs are by far the best choice for final polishing. Speed 1700~2000m/min.

Polishing Pressure on Buffs

The correct balance of speed and pressure can dramatically increase the quality of the surface being polished. Excercise a lower polishing pressure to avoid excessive heat and drag lines in the final stages of finishing.

BURS

Bur Kit- High Speed Steel- USA

Kit contains the most popular sizes in specific shapes. All have 3/32" shanks which will fit most flexible shaft handpieces.

- Select Burs according to the shapes, material and shank diameter.
- Bur diameters are either in ISO No. or mm. The reference chart specifies the nominal diameters of the bur.
- High Speed Steel burs last longer than tungsten vanadium steel.
 Carbide burs have the longest life.
- Small diameter burs are generally run at higher speeds than large diameter burs.
- Use of a lubricant reduces friction and extends bur life.

16. Hart 90°- Extra Fine Cut

Set of 33 burs. Shank size 3/32''. All organized in a polished wooden box.

| ITEM # | DESCRIPTION |
|---------|---------------|
| 26-3451 | #1-34 -33 PCS |
| | (EXCEPT #21) |

17. Hart 45° - Extra Fine Cut

Set of 24 burs. Shank size 3/32''. All organized in a polished wooden box.

| ITEM# | DESCRIPTION |
|---------|---------------------|
| 26-3452 | #2-20 -24 PCS |
| | (EVEN SIZES #21-30) |

18. Setting - Extra Fine Cut

Set of 33 burs. Shank size $\frac{3}{32}$ ". All organized in a polished wooden box.

| ITEM # | DESCRIPTION |
|---------|---------------|
| 26-3453 | #1-34 -33 PCS |
| | (EXCEPT #21) |

19. Flame - Extra Fine Cut

Set of 14 burs. Shank size $\frac{3}{32}$ ". All organized in a polished wooden box.

| ITEM# | DESCRIPTION |
|---------|--------------------------|
| 26-3454 | EVEN SIZES-14 PCS |
| | #2-26 & #30 |

20. Round - Extra Fine Cut

Set of 33 burs. Shank size $^{3}I_{22}$ ". All organized in a polished wooden box.

| ITEM # | DESCRIPTION |
|---------|---------------|
| 26-3455 | #1-34 -33 PCS |
| | (EXCEPT #21) |

21. Bud - Extra Fine Cut

Set of 23 burs. Shank size $\frac{3}{122}$ ". All organized in a polished wooden box.

| ITEM # | DESCRIPTION | |
|---------|---------------|--|
| 26-3456 | #2-34 -23 PCS | |

22. Cone - Extra Fine Cut

Set of 23 burs. Shank size $^3I_{52}$ ". All organized in a polished wooden box.

| ITEM # | DESCRIPTION |
|---------|---------------|
| 26-3457 | #2-34 -23 PCS |

23. Bur Setting Gauges

Precision Swiss made, plate type gauge to check bur diameters in ISO sizes. Easy to read numbers on a silver background.

| ITEM # | DESCRIPTION |
|---------|---------------------|
| 26-3006 | BUR GAUGE-(005-023) |

24. Black Top Burs- German

Made of tungsten vanadium alloy steel. These burs provide extra long life due to superior cutting tooth geometry. Manufactured to close tolerances and precise forms, they are ideal for carving and finishing. Shank size ³/₃₂".

| 26-4192 | SET OF 29 |

28. Black Top Bur-Cup

Set of 17 burs in increments of 0.25 mm, from 1 to 8

mm in a polished wooden box.
Shank size $\frac{3}{32}$ ".

| ITEM # | DESCRIPTION |
|---------|-------------|
| 26-4193 | SET OF 17 |

29. Black Top Bur - Assorted

Set of 30 burs in increments of 1 mm, from 2 to 7 mm in a polished wooden box.

Shank size 3/32".

Contents- 6 each of round, setting, cone, cup and cylinder shapes.

BURS

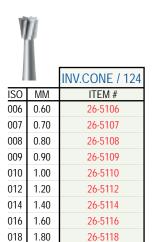

30. Carbide Burs

Designed to cut with confidence, these carbide burs yield high productivity. Exceptional durability and wear resistance enables you to cut and finish at the same time. Burs have $\frac{3}{22}$ shank size for use on friction grip high speed flexshaft handpieces. Speed 30,000-35,000 rpm. Bx/6.

USE OF CARBIDE BURS

- Ensure that the handpiece collet runs true without any axial play
- Insert the bur shank as far as possible in the collet
- Avoid levering with the bur as this may cause breakage
- To produce optimum results, burs must be run at their recommended speeds
- Excessive pressure must be avoided to prevent heat build up
- Eye protection is recommended

31. Rotating Bur Stand

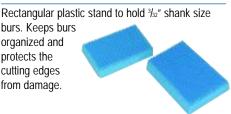

Tiered, heavy duty plastic stand. Accommodates 150 burs 3/32" shank. The revolving design makes it easy to choose the right bur.

| ITEM# | DESCRIPTION |
|---------|-------------|
| 26-2391 | BUR STAND |
| | FOUR TIERS |

32. Plastic Bur Stands

burs. Keeps burs organized and protects the cutting edges from damage.

| 26-2393 | LARGE- 53/4" X 31/2" | |
| 26-2392 | SMALL- 43/4" X 3" | |

34. Wooden Bur Boxes

Hardwood box with hinged cover to store burs with ³/₃₂" shank. Keeps burs organized and protected.

| ITEM# | DESCRIPTION |
|---------|--------------------|
| 26-2396 | BUR BOX- 36 HOLES |
| 26-2397 | BUR BOX- 72 HOLES |
| 26-2398 | BUR BOX- 100 HOLES |

33. Acrylic Bur Stand

Clear acrylic stand with 36 holes to store 3/32" shank size burs.

| ITEM # | DIMENSIONS | |
|---------|---|--|
| 26-2394 | $4^{1}/_{2}^{\prime\prime}$ X 3" X $^{3}/_{4}^{\prime\prime}$ | |

35. Wooden Bur Block

Slanted, hardwood block stand, with non-slip rubber grip base. Organizes burs, drills, files, and brushes of either 3/32" or 1/8" shanks.

| ITEM # | DESCRIPTION |
|---------|--------------------|
| 26-2399 | BUR BLOCK-88 HOLES |

36. Florentine Cylinder Burs

Made from high quality tungsten carbide, these tools are extremely efficient for fine chip removal. Available in different diameters and grades. Shank size $^3I_{22}''$.

| ITEM # | HEAD Ø | GRADE |
|---------|--------|--------|
| 26-5451 | 7MM | FINE |
| 26-5452 | 7MM | COARSE |
| 26-5453 | 9.5MM | FINE |
| 26-5454 | 9.5MM | COARSE |

37. Wax Burs-1445

These are special burs for carving wax models. Widely spaced flutes provide smooth cutting and will not clog like standard burs. Available individually or in a set of 6 shapes. Shank size 3/s2".

| 25-5486 | BUR SET OF 15 PCS | |

BURS

42. Tungsten Carbide Burs

Over all length (h) 44.5mm Shank size $\frac{3}{32}$ ".

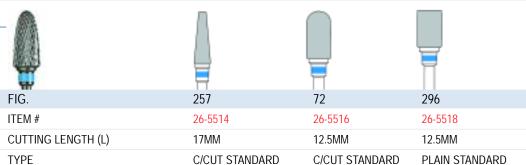

Standard

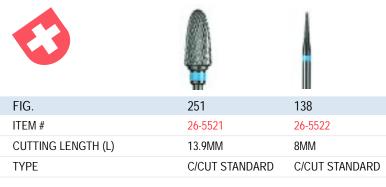

High quality tungsten carbide with fine teeth. Designed to operate at high speeds. Cross cut cutting edges for fast stock removal. Recommended operating speed 15,000-20,000 rpm.

Micro-Grain Carbide

A new generation of tungsten carbide cutters with a micro-fine structure. Extremely silent and vibration free performance. Smooth cutting capability facilitates easy removal of shavings. ecommended operating speed 15,000- 20,000 rpm.

43. Diamond Burs

Diamond coated burs, in a fine grit for countouring work. Ultra smooth surfaces reduce finishing time. Use water as a lubricant. Recommended operating speed 15,000- 20,000 rpm. Overall length (h) 44.5mm Shank size 3/12".

44. Bur Lube

A carefully formulated compound that provides optimum balance of cooling and lubrication. Reduces friction and heat build up, thereby extending tool life. Essential when drilling, cutting or grinding.

45. Gem Setting Bur with Gauge

Set stones like a master jeweler with this indispensable new innovation. Achieve precision without the guess work. Cut channels to a perfect size to match the corresonding gauge. Drop the stone into seat and close the prongs or bezels. Shank size $^3/_{22}$ ".

1. Wax Injectors - Italy

These manual wax injectors have an aluminum melting chamber for uniform diffusion of heat and an optimum fusion of wax. Equipped with a main heating chamber and an auxiliary one on the ejection conduit. Includes three different nozzles-conical, cylindrical and hemi-spherical to suit different matrices.

- Accurate electronic control with thermostat for precise wax temperature
- · Pressure gauge with safety valve for discharge of air
- Superior heating band guarantees uniform temperature
- Exclusive air tight locking system to prevent loss of pressure

3. Standard Vulcanizer

An excellent vulcanizer in a rigid box frame. Cast iron construction. The upper platen slides on twin guides and is raised and lowered by a central screw. All the electronic controls are enclosed in the base. CLA approved.

Features:

- Steel platens measure 5" X 8"
- Maximum opening 3"
- Platen alignment by guide bars
- Ceramic heating element
- · Thermostat, pilot and on/off switch
- Temperature range 100°F-450°F
- Dimensions 15" X 8" X 18"
- Wt. 35 lbs

| 4. | Deluxe | vuicanizer |
|----|--------|------------|
| | | |

A robust heavy duty vulcanizer for medium production. One piece ribbed cast iron construction with dual guide bars for accurate alignment and even pressure distribution. All the electronic controls are enclosed in the base. CLA approved.

Features:

- Steel platens measure 6" X 8"
- · Maximum opening 4"
- Twin guide bars with pressure screw
- · Ceramic heating element
- · Thermostat, pilot lamp, and on/off switch
- Temperature range 100°F-450°F
- Dimensions 14" X 9" X 20"
- Wt. 50 lbs

5. Duplex Vulcanizer- Italy

An excellent vulcanizer for heavy duty production. Time tested and proven to be the best the world over. All units are built to precision standards and factory calibrated.

The Duplex multifunction vulcanizer is designed to operate in two modes using the same machine.

Basic Version: is an open frame with clear view to position the flask in the center of the platen.

Features:

- Steel platens measure 150 x 150 MM
- · Digital thermostat
- Built in timer 0-120 mins.
- Precise control up to 392° F/ 200° C ±°1 C
- · Analog timer -120 minutes
- Dimensions 280 X 210 X 450 MM
- Wt. 56 lbs

Deluxe Version: This unit has the same structure as the basic version but is provided with an integral guard to prevent accidental contact with the heating plates.

Features:

- Steel platens measure 150 x 150 MM
- · Digital thermostat
- Built in timer 0-120 mins.
- Precise control up to 392° F/ 200° C \pm °1 C
- · Analog timer -120 minutes Digital thermostat
- Dimensions 280 X 210 X 450 MM
- Wt. 60 lbs

| 27-1066 | DELUXE MODEL 110V / 60HZ |
| 27-1067 | DELUXE MODEL 220V / 50HZ |

See the operations in two Modes as described below.

MODE-I

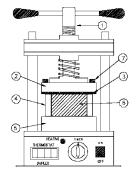

In this mode the upper heating platen (2) transmits the heat to the flask(4) while the central piston (3) descends inside the flask, to compress the rubber mold (6). Use this method for cylindrical or rectangular flasks with metal spacers sliding inside (7) (8).

- Pressure screw (1)
- Flask (4)
- · Lower heating plate (5)
- Kit attachment screws (7)

MODE-II

In this mode the descent of the central piston can be blocked by using a kit that is supplied with the machine. The kit consists of a metal plate 150 x 150mm (3) to fit to the upper heating platen (2). In this mode the upper heating platen not only transmits the heat but also compresses the rubber mold (6). This is the best method for using rectangular flasks without internal sliding spacers.

The Professional Jewelry Molding Rubber

A superior quality Mold Rubber for a full range of applications conveniently cut to size-strips, sheets and rolls.

6. Gold Label® -Molding Rubber

This is a soft, natural, pliable rubber. It has the ideal characteristics for difficult molds containing undercuts, filigree and settings. Rubber is 1/8" thick and vulcanizes at 310°F- 15 minutes for 1/4" mold frame thickness.

| ROLLS | ITEM # | WT. |

| 18" X 18" X ½" | 27-1638 | 50 lb |

No-Shrink Pink Eliminates shrinkage. No difference in size between the model and finished casting.

9. Econosil® -Molding Rubber

This is a harder, firmer version of "Super High Strength" jewelry molding rubber at lower cost. Econosil is a putty-like material that makes strong, tough rubber molds. Red brown in color, it cuts like butter, gives waxes a high shine finish and requires no messy sprays. Waxes self release easily. Vulcanizes at 330°F - 15 minutes per layer of rubber.

| Econosil™ STRIPS | ITEM # | WT. |

| 10 / 2/8 / / /8 | 5 lb. / 2.27 | 7 kg Bx. |

10. VLT[™]- Molding Rubber

Make rapid molds from prototypes. VLT produces highly detailed wax injections with an extraordinary shiny surface that requires less finishing. Vulcanizes at temperatures as low as 160°F/71°C making it ideal for creating tough, strong rubber molds directly from all types of plastic resin models.

| VLT™ CTDIDC | ITEM # | WT. |

12. Gelato™ Super High Strength™

A super high strength molding rubber that cuts like butter. It resists tearing and is strong enough to make complex molds. Stronger than silicone rubber the molds last longer, have a shiny finish and that means less polishing of your castings. Mold packing is easy to do, just press it in with your fingers like putty.

The only patented system to blend investment for fusion, eliminating any presence of gas. This mixer blends the investment under vacuum, shortens working time and is user friendly. The machine guarantees a better environment both for the operator and others working in the same area. The sealed system eliminates toxic dust from the atmosphere.

- · Complete de-gassing of the investment
- Various mixer speeds suitable for every type of investment
- · Memorization of mixing time

27-1071/1072

Just look at the shine! A shiny finish on your molds means less polishing on your casting.

Molds Self Release! There is no need for messy powder or mold release spray.

Mold packing is easy! Spread and press it in with your fingers, just like putty.

| 27-1712 | REPLACEMENT BLADES- 5 PCS |

26. Sprue Rod Former/Sprue Mandrel

Brass sprue former with a cone point to match the wax injector nozzle. Sprue tip may be heated to form the entry hole.

| ITEM # | SPECIFICATION |
|---------|-------------------------------|
| 27-1721 | BURNING MANDREL |
| 27-1722 | SPRUE FORMER 3/16" - CONE |
| 27-1723 | SPRUE FORMER 1/8"- HALF ROUND |

23. Resin Release™

A soy based product that is colorless, odorless and environmentally safe. Helps release models from VLT vulcanized rubber molds.

| ITEM # | SPECIFICATION |
|---------|-------------------------------|
| 27-1698 | RESIN RELEASE -12 OZ (340 GM) |

25. Sprits® Mold Release Spray

A silicone based odorless spray to release wax patterns from rubber or metal molds. Non-toxic, non-CFC and non-flammable. Environmentally safe. Completely EPA compliant.

| ITEM # | DESCRIPTION |
|---------|------------------------------|
| 27-1715 | MOLD RELEASE -12 OZ (340 GM) |

27. IKOHE LMR- Liquid Mold Rubber

A room temperature vulcanizing rubber that requires no vulcanizer or oven. Absolutely no shrinkage. Good tear strength, durability and memory. Ideal for prototypes and limited production.

| ITEM# | DESCRIPTION |
|---------|------------------------------|
| 27-1716 | LMR KIT WITH CATALYST- 1 LB |
| 27-1717 | LMR KIT WITH CATALYST- 10 LB |
| 27-1718 | LMR KIT WITH CATALYST- 50 LB |

CASTING

29. Aluminum Mold Frames

Made of aluminum with a single or double cavity. Side holes provide an escape channel for the excess rubber during vulcanization.

| WXDXT | SINGLE | DOUBLE |
|---|---------|---------|
| 17/8" X 27/8" X 1/2" | 27-1561 | 27-1571 |

| 27-1707 | KNIFE HANDLE #3 |
| 27-1708 | KNIFE HANDLE- PLASTIC |

30. Aluminum Multiple Frames

Single piece aluminum frames with multiple cavities for production. Side holes provide an escape channel for the excess rubber during vulcanization.

7 in 1 Mold Frame: Consists of three frames that can be assembled to get a mold of the desired thickness. Combinations assemble to the following thickness $^1\!L^{\prime\prime}$, $^5\!k^{\prime\prime}$, $^3\!L^{\prime\prime}$, $^1\!L^{\prime\prime}$.

27-1587

| ITEM # | DESCRIPTION |
|---------|---|
| 27-1581 | 3 IN 1 (1 ⁷ / ₈ " X 2 ⁷ / ₈ " X ⁷ / ₈ ") |
| 27-1582 | 4 IN 1 (1 ⁷ / ₈ " X 2 ⁷ / ₈ " X ³ / ₄ ") |
| 27-1583 | 4 IN 1 (1 ⁷ / ₈ " X 2 ⁷ / ₈ " X 1") |
| 27-1584 | 4 IN 1 (1 ⁷ / ₈ " X 2 ⁷ / ₈ " X1 ¹ / ₂ ") |
| 27-1587 | 7 IN 1 (1 ⁷ / ₈ " X 2 ⁷ / ₈ ") |

32. Mold Frame Plates

Smooth flat aluminum plates in different sizes to cover the top and bottom of the mold frames when vulcanizing. Sold in pairs.

| ITEM # | DESCRIPTION |
|---------|---------------------------|
| 27-1591 | MOLD FRAME- 21/2" X 31/2" |
| 27-1592 | MOLD FRAME- 37/8" X 53/8" |

(KerrLab Satin Cast Investment

- · Produces satin smooth, consistently superior casting results · Creates a dense casting by vacuum and centrifugal methods
- · Reduces finishing time and increases productivity · Mixes to a smooth consistency · Forms a strong yet permeable mold · Breaks away cleanly and easily

33. Satin Cast-20

A premier casting investment that blends to a smooth creamy consistency. Includes wetting agents to create a composite high strength mold. For gold, silver, brass and other metals melting under 2000° F / 1093° C

27-1741 45 KG DRUM 27-1742 15 KG CARTON 27-1743 2 KG CANISTER (6PK)

37. KerrCast-2000

A precision investment that offers super smooth surfaces, a reduced burnout cycle and easy breakout.

For gold, silver, brass and other metals melting under 2000° F / 1093° C

27-1744 45 KG DRUM

34. Supervest 20™

Formulated with a thicker slurry than Satin Cast 20. Ideal for both jewelry and small sculpture. For gold, silver, brass and other metals melting under 2000° F / 1093° C

27-1745 45 KG DRUM

27 17 10 10 10 10 010

35. Satin Cast Diamante®

The newest addition, this investment is specially formulated for stone in place casting while offering the benefits of Satin Cast 20.

For gold, silver, brass and other metals melting under 2000° F / 1093° C

27-1747 45 KG DRUM

38. Opticast™

High Temperature melting alloys- 2200°F / 1200°C

· Easy Quench formula · Prevents cracking and fissuring

· Sharp detail · Forms a strong mold · Good dimensional accuracy

For Platinum, Stainless steel, Nickel and

A platinum investment delivering incomparable surface finish and mold strength. Its high permeability produces crisp, dense patterns while minimizing inclusions.

27-1752 OPTICAST 35 KG

27-1753 OPTI-BIND 8 OZ (CAT.) CASE/4

36. Satin Cast Xtreme®

Contains a higher percentage of cristobalite, allowing for a higher temperature tolerance for easier casting of 18 karat white metals.

For gold, silver, brass and other metals melting under 2000° F / 1093° C

27-1746 45 KG DRUM

39. Platinite

High strength, high temperature investment for casting platinum and stainless steel alloys. Delivers casting with sharp detail. Good dimensional accuracy.

27-1751 45 KG DRUM

40. Pandora Alloys for Casting and Mechanical Works

High purity alloys when added to 24kt gold will create a lower carat and color of your choice. The alloys listed offer the optimum balance between color and workablity. Sold in troy ounces.

| ITEM # | USE FOR KARAT | COLOR | APPLICATION | |
|---------|---------------|----------------|-----------------------|--|
| | | | | |
| 27-2001 | 8-9-10-14kt | 2P14/PO Yellow | Casting | |

| 27-2081 | 800-925 | 1P/AG-U Silver | Casting- Anti-tarnish | |

- Casting temperature should be approximately 100-150°F above melting temperature
- Casting temperature will vary slightly depending upon the particular alloy used
- Flask temperature will vary depending on the size of the casting
- Casting grain alloy is a mixture of gold and other specialty alloying metals
- Mixture is ready to be melted and cast or poured into an ingot mold for rolling or drawing

CASTING

41. Investment Mixer

A planetary blending system to mix generous quantities of investment. The mix is of a consistent density without air entrapment. Bowl and whip are of stainless steel. Capacity 4½ Qt.

| ITEM # | DESCRIPTION |
|---------|-------------------------------|
| 27-1511 | K45 - 110V/60HZ |
| 27-1512 | K45 - 220V/50HZ |
| 27-1513 | SS REPLACEMENT BOWL- 41/2 QT. |
| 27-1514 | SS REPLACEMENT WHIP |

42. Investment Mixing Bowls-Rubber

Bowls in two sizes, made in hard long lasting rubber. Ideal formixing investment powder.

| ITEM # | DESCRIPTION | DIMENSIONS |
|---------|--------------------|------------|
| 27-1500 | SMALL - 11/4" PT. | 4½″W |
| 27-1501 | MEDIUM - 11/2" QT. | 6″W |
| 27-1502 | JUMBO - 1 GAL. | 10″W |

43. Hydro Air Wash Gun

Reduce cleaning time while removing investment from castings. The wash gun uses water and compressed air (1/4") at 70 -200 PSI. Connects to a sink faucet with ¾" hose connection.

Set Includes: Trigger air valve, nose protector and rubber hand grips.

DESCRIPTION ITEM # 27-1555 HYDRO AIR GUN

44. Investment Vibrator

- Reduces air bubbles and voids around wax patterns
- Round top for flask up to 4.25"
- · Compact design with variable speed
- Dimensions: 150 x 150 x 110mm
- Wt. 4 lbs

45. Investment Spatula

Useful for mixing, forming or shaping wax or clay. Conveniently sized stainless steel rounded blade with handle. Overall length 81/2".

| ITEM # | DESCRIPTION |
|---------|----------------------|
| 27-1506 | SPATULA- 51/2" BLADE |

46. Dial Thermometer

Dual scale stainless steel thermometer with an 8" stem. Use to calibrate vulcanizers.

| ITEM # | RANGE |
|---------|-----------------------|
| 27-1517 | 50° - 400°F/ 10-200°C |

47. Investment Scale

Easy to read dial scale with a removable pan to transfer investment to mixer. Dimensions: 10" X 7" X 16" Ht.

| ITEM # | DESCRIPTION | | |
|---------|-------------------------|--|--|
| 27-1508 | SCALE - CAPACITY 20 LBS | | |

48. Investment Remover

Non-corrosive, non-foaming solution formulated for fast clean up of castings. Mix one part of solution with five parts of water. Not for use on aluminum, pearls or calcified stones.

| ITEM # | DESCRIPTION |
|---------|----------------------------|
| 27-1557 | INVESTMENT REMOVER- 1 GAL. |

49. Investment Scoop

Plastic investment scoop has high supporting sides to avoid spillage and waste. Dimensions: 81/2" X 43/4" X 3"

| ITEM# | DESCRIPTION |
|---------|------------------------|
| 27-1504 | SCOOP - CAPACITY 3 LBS |

50. Regular Flasks

Durable 14 ga stainless steel flasks are corrosion resistant. Withstands thermal shock during quenching. All surfaces of the flasks have a smooth finish and edges are machined for optimum sealing.

| HEIGHT | HEIGHT 21/2" | | 4" | 5" | 6" | |

54. High Pressure Water Jet Plaster Remover

- A high pressure blaster for removing investment off models, trees after casting
- · Rugged stainless steel booth with supporting stand
- · The unit has a large viewing window and is well illuminated
- Rubber gloves are mounted on the front for maneuvering items inside the chamber
- · Environmentally friendly, uses high pressure water jet at 120 Bar

SPECIFICATIONS:

PUMP HP: 2.2 HP
PRESSURE: 120 BAR
DIMENSIONS: 25" X 20" X 50"
WEIGHT: 70 LBS

Unit Includes:
Pressure Pump at 120 Bar.
High Pressure Hose for connecting to washing booth.
Supporting Trolley.

| ITEM # | DESCRIPTION |
|---------|--------------------------|
| 27-1551 | HP* BLASTER 110V / 60 HZ |
| 27-1552 | HP* BLASTER 220V / 50 HZ |

CASTING

55. Non-Asbestos Paper Rolls

Non asbestos paper is required to absorb the excess binder moisture when investing platinum. The paper is used as a liner prior to pouring the investment. Use a single layer on the inside of the flask and a double layer at the bottom.

ITEM # W.Y.T. LENGTH

| ITEM # | WXT | LENGTH |
|---------|--|--------|
| 27-1381 | 2 ¹ / ₂ " X ¹ / ₁₆ " | 50 FT |

59. Crucible with Handle

Melting dish with a removable heat resistant handle. Made of fused silica for efficient melting. Will not contaminate precious metals.

| ITEM# | DESCRIPTION |
|---------|----------------------|
| 27-1497 | CRUCIBLE WITH HANDLE |
| 27-1498 | HANDLE ONLY |
| 27-1261 | CRUCIBLE 7½" OZ. |

60. Crucible Tongs

Steel tongs with curved or straight ends to hold heated crucibles while pouring molten metal into

| ITEM # | DESCRIPTION |
|---------|--------------|
| 27-1494 | 19" STRAIGHT |
| 27-1495 | 19" CURVED |

61. Flask Tongs

Light weight spring steel tongs used for holding small or large flasks.

| ITEM # | DESCRIPTION |
|---------|----------------|
| 27-1492 | 15" FLASK TONG |

62. Sprue Bases

Long lasting rubber bases for spruing all types of trees. Various shapes and different diameters are available with all sizes of button holes. Fits to flask size as given below.

Tree Style-C: Most popular sprue base with 3k'' hole, forming curved indentation in the investment.

| ITEM # | FLASK Ø | BUTTON ID. |
|---------|---------|------------|

| ITEM# | DESCRIPTION |
|---------|----------------------|
| 27-1376 | UNIVERSAL SPRUE BASE |

64. Base Mate®

Holds sprue bases for treeing. Tilts up or down and rotates for perfect viewing at any angle.
Includes spring tension ring for 31½" and 4" sprue bases.

| ITEM# | DESCRIPTION |
|---------|-------------|
| 27-1379 | BASE MATE |

65. Inva-Cast Vacuum Machine

Bench top unit that allows investment of both standard and perforated flasks using vacuum technology. Superior air bubble elimination for cleaner, denser molds. Easy to operate, the machine produces consistent results, while reducing the risk of casting defects. An additional feature is the low maintenance aspect of filters, lines and pump. The system includes all the essentials for vacuum casting.

Unit Includes: Vacuum pump, 3", 3%" and 4" rubber seal, 3" x 3%" perforated flask, sprue base, flask tongs, silicone vacuum seal 7%" round, bell jar 8" x 9" and vacuum pump oil. Instructions included.

Dimensions: 22" x 14" x 15" ht. Wt. 90 lbs

| ITEM # | DESCRIPTION |
|-------------|-------------------------------|

67. Standard Vacuum - Machine for Investing & Casting

A compact bench top investing and casting machine. Use for vacuuming air and gas from flasks to ensure positive molten metal flow. A heavy duty vacuum pump creates negative pressure 27"-29" hg at sea level. Investing is done on the table which can be vibrated to eliminate air and gas bubbles. Maximum solid flask size \emptyset 4" X 6" height.

Unit Includes: Machine with vacuum pump, hose, crucible with handle, silicone gasket and complete instructions.

Dimensions: 14" X 14" x 181/2" Ht. Wt. 48 lbs.

| ITEM # | DESCRIPTION |
|---------|--------------------------|
| 27-1111 | COMPLETE UNIT 110V/50HZ |
| 27-1112 | COMPLETE UNIT 220V/60HZ |
| 27-1114 | TABLE ONLY WITHOUT PUMP |
| 27-1115 | VACUMM PUMP AND OIL ONLY |

68. Centrifugal Machine with Long Arm

A compact machine that protects the operator against accidental metal spillage from the whirling crucible. A heavy duty spring swings the long rotating arm so that metal is forced into the flask. Maximum flask, Ø 3½" X 5" ht. Unit is made of steel with a baked enamel finish. The base is drilled for fitment to bench.

Recommended crucible 9 oz.

Unit Includes: Drive mechanism with long arm, balancing weights, cradle for 2½" Ø flask, sprue base, rubber mixing bowl, flask tongs, spatula and 10 lbs of investment. (without drum and cover)

Dimensions: 24" x 24" x 12" Ht. Wt. 18 lbs

| ITEM# | DESCRIPTION |

Unit shown with drum and cover

69. Neycraft® Centrifugal Casting Machine

Engineered with safety in mind, the Neycraft centrifugal casting machine accommodates all standard size investment flasks up to 4" X 4", maximum metal capacity 9 oz. Spring loaded combination winding, locking and release mechanism. Heavy duty drive shaft rotates in sealed bearings.

Unit Includes: Machine with one silica crucible, universal flask tongs, one 2" ø stainless steel investment flask, one 3" ø flask and two sprue bases. Instructions included.

Dimensions: 20" X 20" X 12" Ht. Wt. 26 lbs

70. Neycraft® Fiber Furnace

The only bench-top electric burn out furnace with a one piece molded heating chamber. The outer cabinet is sturdy steel construction and the fiber muffle has an embedded heating element. Energy efficient design with four wall heating for even heat distribution.

- · Fast start up time- 15 min. to reach 1000°F
- Max. temperature 2000°F
- · Dual temperature indicator in F/C°
- · Top port for venting wax and water vapor
- Chamber accommodates a 6" flask
- Inside dimensions 9" X 9" X 61/2"
- Outside dimensions 15" X 14½" X 16½"
- · Wt. 36 lbs

All Furnace warranties excludes damage due to overfiring, exceeding melting temperature and improper electrical installation.

71. Fiber Burnout Furnaces

Energy efficient furnaces for jewelry and ceramic. The firing chamber is a one piece ceramic fiber shell with embedded elements. For greater thermal efficiency the space between the steel case and the fiber shell is packed with extra fiber insulation. The door seals tightly with a heavy spring latch. All the controls are located in the base. Reaches 1000 °F (538 °C) in 30 minutes. Firing chamber 13" X13" X 9" Ht. Pyrometer is not included.

- · Built in thermocouple
- · Infinite control dial with pilot light
- · Pyrometer location hole provided
- Outside dimensions: 19" x 181/2" x 19"
- · Wt. 108 lbs

Digital Furnace: (Programmable)

- Preset programs or customize your own
- · Preset up to eight ramps and eight dwells
- · Auto shut off if controller fails
- · Controller stores up to 6 programs
- Outside dimensions: 19" x 181/2" x 19"
- Wt. 108 lbs

All Furnace warranties excludes damage due to overfiring, exceeding melting temperature and improper electrical installation.

73. Satellite Furnaces

Heavy duty steel construction with double coated protection in hammertone gray. Temperature ramp up from 0-700°F in 45 min. and 700-1400°F in an additional 15 min., approx. Features include heavy duty element, side opening door, top venting for moisture and wax escape. Convenient front viewing of control panel. Maximum operating temp. 1800°- 2000°F.

Manual: Temperature and time are to be manually controlled.

Automatic: Includes a solid state relay that allows you to set and hold temperature, but not the time. Digital: Holds up to six separate programes, with eight segments per programe, set up and time.

Manual Units: J-100 & J-200

Automatic Units: J-101 & J-201

Heating elements are not under warranty

All Furnace warranties excludes damage due to overfiring, exceeding melting temperature and improper electrical installation.

76. Stirring Rods

High heat resistant graphite or quartz stirring rods to stir molten metal in crucibles or dishes.

| ITEM # | DESCRIPTION | |
|---------|--------------------|--|
| 27-1298 | CARBON -12" X 3/8" | |
| 27-1299 | QUARTZ -12" X 3/8" | |

77. Melting Dish- Regular

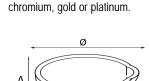

Quality made dish of fused silica with a clay bond. Best suited for all high temperature melting of metal alloys and precious metals.

| ITEM # | CAPACITY | TYPE |
|---------|-------------------------------------|---------------|
| 27-1261 | 7 ¹ / ₂ " OZ. | STRAIGHT BACK |
| 27-1262 | 20 OZ. | HIGH BACK |

78. Fused Silica Melting Dishes

Clay bonded fused silica melting dishes withstand temperatures up to 2800°F/1538°C. They have good thermal conductivity and will not contaminate metal alloys,

| ITEM# | ØXA | DWT | GRAMS |
|---------|--------------|-----|-------|
| 27-1271 | 13/4" X 5/8" | 16 | 48 |
| 27-1272 | 21/4" X 3/4" | 19 | 96 |
| 27-1274 | 3" X 1" | 25 | 155 |
| 27-1276 | 4" X 13/8" | 35 | 420 |

79. Crucibles for Centrifugal Casting

These fused silica crucibles are available in various styles and are designed with high side walls for extra safety when casting. Metals may be torch melted in these crucibles as they sustain high temperatures up to 2500°F/1370°C.

| ITEM # | DESCRIPTION |
|---------|------------------------------|
| 27-1281 | LARGE-A 3 OZ. |
| 27-1282 | LARGE-D SMALL ORIFICE 10 OZ. |
| 27-1283 | LARGE-D LARGE ORIFICE 11 OZ. |
| 27-1284 | NEY 9 OZ. |

Using Ceramic Crucibles

To provide minimum oxidation in the casting of gold alloys, it is recommended that a thin film of borax be melted into the discharge path of an orifice prior to making the first melt in the crucible.

80. Morgan® Platinum Melting Dish

A melting crucible specifically for platinum, made by Morgan. Designed to withstand the high temperatures that are needed for platinum and precious alloys.

| ITEM # | CAPACITY | TYPE |
|---------|----------|---------------|
| 27-1266 | 8 OZ. | STRAIGHT BACK |
| 27-1267 | 10 OZ. | HIGH BACK |

81. Platinum Melting Dish- Japan

A top quality dish for high temperature metal melting, especially suitable for platinum.

Lining Clay Crucibles

Clay crucibles need to be treated before use for extended life. Fill about 25% of the crucible with a mix of 50% borax* and boric acid*. Heat the crucible gradually until the mixture melts. Carefully tilt the crucible so as to coat the entire inner surface. Then pour the excess away and allow the crucible to cool to room temperature.

2. Elmasonic E-series

The NEW Elmasonic E series has these latest features for quicker improved cleaning results

- Microprocessor controlled 37khz transducer power, self regulating generator
- Electronic diode display for time and temperature
- Auto-start temperature controlled / temperature selection
- Permanent sweep for an improved cleaning performance
- Brushed stainless steel cavitation resistant tanks with calibrated fill level
- · Ceramic heating elements tested and absolutely dry run proof
- · Safety switch/off

4. Speed Brite Ionic Cleaners

A fast cleaning process for jewelry and precious stones, without ultrasonic waves, in less than a minute. This process, called ionic cleaning, uses an electrolyte solution that imparts a brightness to jewelry and a sparkle to precious stones. Environmentally safe, it is a gentle way to clean emeralds, opals, pearls and other soft stones.

Speed Brite Ionic Adapter: Boost the power of your ultrasonic cleaner by the add-on ionic adapter which comes complete with transformer and metal hook for suspension. (UL approved)

Gem Sparkle Cleaning Solution: Specifically formulated solution to remove dirt, grime and oxidation. May be used to clean delicate stones with a soft brush.

5. Hoffman® Steam Cleaner

Model GEM3: • A portable, versatile and safe steam cleaner

- Does not have a boiler Instantly delivers steam at 80-120 psi
- Water tank can be refilled at anytime, even when unit is hot
 Model JEL3: A technologically superior micronic cleaning system
- Saves time, boosts productivity Develops 70-90 psi steam
- Easy reservoir refill manual Adjustable thermostatic controls
- Fast temperature / pressure recovery Rust inhibited pressure tank
- · Low maintenance · Finger tip / Solenoid / Foot switch control
- · ASME and UL listed.

| ITEM # | SPECIFICATION | CAPACITY |

DAPPING

Master Dapping Sets- Italy

Premium quality dapping and punch sets all made in Italy. Machined to precision tolerances in tool alloy steel, each punch is hardened, tempered , ground and polished to a mirror finish. It is the highly polished surface that guarantees that the metal being shaped will not have any streaks or flaws. All sets are supplied with a polished wooden base to store each individual punch and block.

13. Matched Set - Block with 21 Punches 4-54MM

22. Wood Dapping Block & Punch-Set

Hardwood block, smoothly finished, has shallow concave depressions on all six sides. Comes in a set with two punches. Use for repair and

removing dents. Wt. 1 lb

| ITEM# | DESCRIPTION | SIZE |
|---------|---------------|-----------------------|
| 29-1151 | W/DAPPING SET | 21/2" X 21/2" X 21/2" |

Daps and dapping blocks may be made of metal or wood.

A wooden dapping block is less expensive than a metal dapping block. Wooden dapping blocks have shallow depressions and some blocks have multiple depressions.

A dap is a domed hand tool used to form metal shapes in the depressions of a dapping block.

A dapping block may be a rectangular block or a cube that has depressions that match the dap.

Forming of metal in dapping blocks is usually done in thin gauges

and in soft metal. Use a hammer or a mallet for dapping. For Hammers and Mallets see page # 184

A working block and a stake is an essential tool for almost every silversmith. See pg# 186

26. Necklace Mandrel

Highly polished cast iron and chrome plated necklace mandrel. Shape and form metal or wax directly on the mandrel.

Wt.6 lbs

23. Micromat Leveridge Type Gauge -USA

The most versatile measuring instrument for any jewelry appraiser or gem cutter. Estimates weight of diamonds mounted or loose. May also be used for other precious gems and pearls. Comes with high setting attachment and weight estimator. Includes an inside measuring system for rings. Precision crafted for years of service.

| ITEM # | DESCRIPTION |
|---------|-------------------------------|
| 35-1141 | MICROMAT LEVERIDGE TYPE GAUGE |
| 35-1142 | BOOK & CASE |

25. Quick Mini Digital Gauge- Japan

An ingenious measuring device designed and crafted to the most exacting standards. Lightweight, ergonomic body, with large measuring faces, useful for both thick and thin parts. Clear digital readout with a maximum reading of 25mm/1" and a resolution of 0.01mm/ 0.0005".

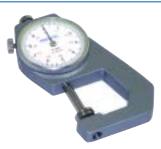

| ITEM # | DESCRIPTION |
|---------|--------------------------------------|
| 35-1151 | QUICK MINI 0-25MM (Battery included) |

27. Pearl & Stone Dial Gauges

A sensitive, precision engineered dial gauge for accurate measurements of pearls and other small stones. Parallel ground measuring faces for rounds and baguettes in 0.1mm increments.

Dial rotates for absolute zero setting.

| ITEM # | DESCRIPTION | CAPACITY |
|---------|----------------------|----------|
| 35-1161 | S/DIAL GAUGE-GERMANY | 10MM |
| 35-1162 | S/DIAL GAUGE-GERMANY | 20MM |

| 35-1166 | S/DIAL GAUGE-VALUE | 20MM |

24. Presidium® Gauges

Presidium® Dial Gauge:

Predictable accuracy. Read out measurement in millimeters and weight in carats simultaneously. Measures stones up to 23 mm in divisions of 0.1mm. Hardened wear resistant measuring surfaces.

Includes a conversion booklet and case.

Presidium® Gem Computer Gauge:

Estimate the weight of gemstones with precision and speed, 0.01mm resolution. Direct carat conversion for round brilliant cut diamond. Covers 132 gemstones in nine different shapes. Retrieve the specific gravity from the SG dictionary just by entering the name of the stone.

| ITEM # | DESCRIPTION |
|----------|--------------------------------|
| 35-1146 | DIAL GAUGE 0-23MM |
| 35-1147* | DIGITAL GEM STONE GAUGE 0-23MM |
| 35-1148 | GEM COMPUTER GAUGE 0-25MM |

^{*} see page 168 for details

26. C-Master Jewelry Gauge- Japan

A compact, highly accurate digital gauge for easy stone measurement. The unit is provided with a twin gauge head that measures both inside and outside. Features automatic calculation of caratage. Measures from melee to taper with maximum reading of 25mm/1".

| ITEM # | DESCRIPTION |
|---------|------------------------------------|
| 35-1155 | C-MASTER 0-25MM (Battery included) |

28. Stone Millimeter Dial Gauges

A well designed gauge that provides an easy measuring system for single hand operation. Precision parallel measuring faces for rounds and baguettes in 0.1mm increments up to a maximum of 10mm. Dial rotates for absolute zero setting.

| ITEM # | DESCRIPTION |
|---------|--------------------------------|
| 35-1168 | MILLIMETER DIAL GAUGE 0.1-10MM |

VIDE-IBO

29. Compact Diamond Scale

A Diamond Scale in the palm of your hand.

- Unique lightweight ultra precision scale Easy to hold and operate
- Displays diameter and weight in less than three seconds
- Maximum diameter up to 8mm
- Weighs from 0.005 to 1.2 carats with an accuracy within four to five microns
- · Exclusive PC software
- · Bluetooth technology
- Transfers data to your company's computerized inventory or spreadsheet
- Saves time and eliminates errors

BREAKTHROUGH TECHNOLOGY

Diameter and weight in a split second Exact caratage in any shape

| ITEM # | DESCRIPTION |
|---------|------------------------|
| 35-1135 | DIAMOND SCALE VIBE-130 |

30. Fan Type Diamond Gauge

Compact, fan type, pocket gauge in stainless steel. Measures in carat weight all stone cuts in brilliant, marquise, pear, square, emerald and oval.

Overall length 3½".

| ITEM # | DESCRIPTION CARAT |
|---------|------------------------------|
| 35-1061 | 3 ARMS ROUND FRANCE 0.1 TO 4 |
| 35-1062 | 4 ARMS ROUND FRANCE 0.1 TO 6 |
| 35-1063 | 7 ARMS ASSORTED USA 0.1 TO 8 |

31. Sliding Gauges- Germany

Convenient pocket sized sliding gauges in alloy and brass. Clear machine marked graduations. Useful for quick outside measurements (in/mm) of small parts or stones.

| ITEM # | DESCRIPTION |
|---------|-------------|
| 35-1011 | ALLOY 50MM |
| 35-1012 | BRASS 60MM |
| 35-1013 | BRASS 80MM |

32. Jo-Di Gauge

Unique international sizing system. Measures diameter and width of four basic shapes: round, marquise, emerald and pear. High contrast black anodized scale readings are to be compared with the reference booklet. Comes in a handy wallet.

| ITEM# | DESCRIPTION |
|---------|-------------|
| 35-1068 | JO-DI GAUGE |

33. Accurate Diamond Gauge

Pocket sized, aluminum gauge, provides the comparative size of gemstones in carats. Size range is 1 point to 2.1 carats. For size estimates of round, brilliant cuts and baguettes.

34. Diamond Gauge- France

Polished steel gauge, in either oval or rectangular shape.

Determines the carat weight of loose or
mounted stones, from 1 point to 4 carats.

Marked sizes for easy reading.

| ITEM # | DESCRIPTION |
|---------|-----------------------|
| 35-1047 | 5 CM -OVAL |
| 35-1048 | 9 X 205 CM -RECTANGLE |

35. Diamond Sellers

Exhibit the brilliance of precious gemstones in an eye catching display. Safe, secure and a more efficient way to reveal the shapes of emerald, oval, pear, square, round and marquise.

| ITEM # | DESCRIPTION |
|---------|---------------------------|
| 30-1197 | 7 DIAMOND ARMS - MIX CUTS |
| 30-1198 | 10 DIAMOND ARMS - ROUND |

© Copyright 2008 123

Professional, compact, sleek penlike instrument. Digital electronic circuitry consistently and reliably distinguishes between diamonds and simulant. Gives an audible continuous-beep when diamond is tested. Comes in a vinyl pouch.

<u>Diamond Mate-A:</u> Operates on alkaline AAA batteries May be used with AC adapter. Batteries not included

<u>Diamond Mate-C:</u> Operates on rechargeable NICAD batteries May be used with AC adapter. Batteries not included

37. **PRESIDIUM** Moissanite Tester:

Distinguishes diamond from moissanite. A reliable hand held tester to identify synthetic moissanite by capacitive measurement. A special polymer grade probe gives an instantaneous reading. This tester is recommended for use after a positive testing result for diamond with a conductivity tester. Operates on 3 (AAA) alkaline batteries (not included).

<u>Multi Tester:</u> The multi-tester distinguishes diamond from CZ and moissanite by the combined principle of thermal and electrical conductivity from patented technology. A micro-processor processes the data and displays the results in seconds. Features include a retractable probe that ensures accurate and consistent pressure, LED display and low battery indicator. Operates on 3 (AAA) alkaline batteries (not included).

| ITEM # | DESCRIPTION | DIMENSIONS |
|---------|-------------------------------------|-------------------|
| 54-1131 | DIAMOND MATE - A | 160 X 30 X 20.5MM |
| 54-1132 | DIAMOND MATE - C | 160 X 30 X 20.5MM |
| 54-1133 | MOISSANITE TESTER | 160 X 21 X 30MM |
| 54-1134 | MULTI TESTER | 160 X 42 X 22MM |
| 54-1130 | 1130 110/220V AC ADAPTER (OPTIONAL) | |

38. PRESIDIUM Diamond Fact

A professional top of the line tester. Instantly separates simulant from the genuine. Small compact pocket model has needle tip testing point for stones as small as 0.02 carat. Operates on two AAA batteries (not included).

Distinguishes Diamond from CZ but not Moissanite

| ITEM # | DESCRIPTION | DIMENSIONS |
|---------|--------------|----------------|
| 54-1135 | DIAMOND FACT | 92 X 22 X 68MM |

Comes in a vinyl pouch. The gem tester instantly separates diamond from all known simulants. The design of the gem tester is based on thermal conductivity. A probe measures the rate of heat being conducted away from the stone. The gem tester can be used on mounted and unmounted stones as small as 0.02 carat. Comes complete with AC adapter in a velvet lined box. Also operates on two AA batteries (not included).

Distinguishes Diamond from simulated stones.

| ITEM # | DESCRIPTION | DIMENSIONS |
|---------|-------------|-----------------|
| 54-1136 | GEM TESTER | 180 X 96 X 72MM |

40. Culti Diamond Testers

Improved positive sensing distinguishes the look alike from the genuine. A very reliable tester that identifies natural diamond from white corundum, Y.A.G. and other simulants. Advanced electronic display. Supported by manufacturer's warranty.

IC chip built-in for pin point accuracy
Genuine diamond indicated by a red light and beep
Moissanite cannot be distinguished by these testers
Two AAA alkaline batteries, loose stone holder and case are included

| ITEM # | DESCRIPTION |
|---------|---------------------------------|
| 54-1121 | DIAMOND TESTER CULTI 111 -JAPAN |
| 54-1122 | DIAMOND TESTER -VALUE |

41. MIZER Diamond Testers-USA

Fast, sensitive and reliable. Delivers result in seconds. Tests even the smallest gemstones. Negligible warm up time, automatic shut off and audible diamond signal. Supported by manufacturer's warranty.

12 light linear display to identify diamonds, CZ and other stones.

Metal alert alarm and audible diamond signal.

Operates on one 9V alkaline battery

| ITEM # | DESCRIPTION |
|---------|-------------------------------------|
| 54-1139 | DIAMOND TESTER - (Battery included) |

42. IKOHE Moissanite* Tester

The revolutionary new tester that outsmarts and even detects moissanite, which is a simulant for diamond. Ultra sensitive, can check stones of 0.01 carat or less. Readings displayed on both sides allowing use in either hand. Backed by manufacturer's warranty.

Separates synthetic moissanite from diamonds after testing with a conventional diamond tester. Flashing green light indicates that stone is moissanite or synthetic. Operates on one 9V alkaline battery

| ITEM # | DESCRIPTION |
|---------|--|
| 54-1137 | MOISSANITE TESTER - (Battery included) |

43. Diamond Scribe

A slim finely pointed scriber for layout work. Will mark glass, stone, ceramic and all precious metals. Diamond tip is retractable for protection.

| ITEM # | DESCRIPTION |
|---------|----------------|
| 54-1141 | DIAMOND SCRIBE |

44. CZ Master Sets

Hand graded by master craftsmen for precision color accuracy against G.I.A. master diamonds. All CZ masters in the set fall within the required world standards. Each set has a five year manufacturer's warranty against color change. All CZ's are 0.80ct.-1.0ct. diamond equivalent.

| ITEM # | DESCRIPTION |
|---------|--|
| 30-1201 | 5- STONE SET (D, F, H, J & L) |
| 30-1202 | 5- STONE SET (E, G, I, K & M) |
| 30-1203 | 10- STONE SET (D, E, F, G, H, I, J, K, L & N) |
| 30-1218 | COLOR GRADING PAPER (PK/25) |

* Moissanite is a stone available as natural or synthetic. It is similar to diamond in color, hardness and thermal conductivity. Using a moissanite tester will ensure your diamond is not a simulant.

Individual CZ color graded stones are available.

45. Gem Parcel Boxes

Features black simulated leather cover with adjustable partitions to store precious gems. Interior is lined with soft velvet and includes an elastic band to prevent displacement of parcels.

Parcel papers are not included.

| ITEM# | DIMENSIONS | |
|---------|--------------------|--|
| 30-1301 | 4" X 61/k" X 23/4" | |
| 30-1302 | 4" X 11¾" X 2¾" | |

47. Gem Parcel Cases with Adjustable Partitions

Unique black simulated leather covered boxes with adjustable partitions and satin-lined interiors.
Features a combination lock for security.
Parcel papers are not included.

30-1322

| ITEM # | DIMENSIONS | |
|---------|------------------|--|
| 30-1321 | 4¾" X 7¼" X 2½" | |
| 30-1322 | 4¾" X 11" X 21½" | |

49. Diamond Vest- for Dealers

Extra durable navy blue vest with two zippered pouches and two open pockets. Fits over shoulders with pouches, one on each side, and anchors with an adjustable strap

to suit all sizes.

| ITEM # | DESCRIPTION | SIZE |
|---------|--------------|--------------|
| 30-1361 | DIAMOND VEST | 20" X 113/4" |

46. Security Wear for Diamond Dealers

Exquisitely handcrafted, well designed to conceal and carry up to 24 diamond parcel papers. Specially created for diamond dealers. This innovative new concept will revolutionize the way precious gems are transported and presented to potential clients.

The belt can be adjusted according to your measurement.

| ITEM# | DESCRIPTION | |

The Art of Engraving D. WEEK

A complete authoritative introduction to the art of gun engraving. Contains step by step instructions, technical information, designs and levisite to complete such accepts the state of the Cuntains siep-uy-siep instructions, technical intumation, designs and layouts to complete each project. Over 1,400 photos designs and designs tos, drawings and designs.

61-1115 (Hardcover – 196 pages)

Machine Includes self centering ring holder, diamond tip, one lettering dial (32-1014), brass practicing rings and instructions.

ikohe 1. Inside Ring Engraver

Point-of-purchase engraving offers customers complete satisfaction. Bright legible marking that makes every ring a memorable possession. Features include automatic centering of rings, one engraving reversible dial, auto-indexing, pressure and depth regulation. Operating instructions included. Dimensions: 12" X 10" X 163/s-" Wt. 13 lbs.

2. Engraving Character Sets- for Outside Engraver

Engraving copy scripts are high accuracy characters made by a "V" groove in bright coated brass. Made of standard 11/4" width blanks, these fonts will fit the machine slides of most manufacturers. Sets of different font styles come neatly organized in a polished wooden box. Individual replacement letters and numbers are available.

3. Presidium® Outside Engraver

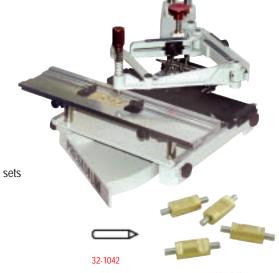

A manual engraver so easy to operate anyone can get professional results in minutes. Engrave on small articles of jewelry, bracelets, pendants, watch cases and gifts. Uniform character spacing and controlled engraving depth provides clarity of proven quality

- 15 Pantograph ratios from 2½:1 to 6:1
- Universal vise has 360° rotation and 8 index positions
- · Height adjustment up to 115mm
- Slide accommodates 11/4" and 23/4" character blanks
- · Diamond tip
- · Complete instructions included
- Dimensions: 141/2" L X 14" W X 11" Wt. 18 lbs.

Machine includes pantograph, diamond tip, copy slide, universal vise, and complete instructions. * Letter set not included

4. Presidium[®] Inside Ring Engraver

The Presidium inside ring engraver is manufactured to the highest standards with exterior in powder coated paint. The machine is compact, with diamond tip and automatic letter spacing with uniform depth control. Ideal for all sizes of narrow, wide or stone set rings.

- Ring-holding capacity from Ø 19 to Ø 30 mm
- · Self-centering jaws with stone support pad
- · Brass practice rings
- Lettering dial upper, lower case and numerals
- · Engraves italic 2 mm letter height and block in 1 mm letter height
- Dimensions: 12" X 10" X 163/s-" Wt. 15 lbs.

Machine Includes self centering ring holder, diamond tip, one lettering dial (32-1035), brass practicing rings and instructions.

5. Zodiac Signs

Made on standard brass blank with bevel edge to fit all standard machines. Available in a set of 12 in a polished wooden box.

- Dimensions: 3" X 3" X 4"
- Wt. 3 lbs.

Sagittarius

6. Elma Ringstar Engraver

A top of the line inside ring engraver which features variable engraving letter size from the same letter script. Text is composed on the type holder to give error free engraving. Fine control of depth of engraving by a diamond tip. Easy to set up and operate.

- Features automatic spacing of characters Depth control by a micrometer screw
- 360 Rotating ring holder Character height is continuously adjustable from 1-3mm
- Dimensions: 8" X 14" X 18"
- Wt. 15 lbs.

Unit Includes: ring holding fixture with delrin jaws, diamond tip, letter type rail, single line script set R5000 and instructions.

7. Elma Modulgrav Engraver

A complete machine dedicated to engraving all articles of jewelry: gold, silver and platinum. The modular design expands the capability of the machine for many types of engraving. Inside and outside engraving, flat and curved engraving. Larger and longer items like trophies and plaques can all be engraved by changing the modules.

• Dimensions: 11" x 15 "x 28"

• Wt.: 60 lbs.

Complete Unit Includes: Main frame (without motor), work platform, copy slide, engraving mouse, 32-1082, 32-1084, 32-1087, 32-1111, diamond tip and instructions.

GraverMach®

New air pulse porting technology (patent pending) inside the control unit gives each handpiece excellent range of power with perfect control throughout an expanded range of impact speeds. The GraverMach features 400 to 8000 strokes per minute, a newly developed throttle bias adjustment valve for tailoring throttle response to your work and a dual-stage precision air regulator. Advanced ergonomics include front air pressure adjustment, quick change air couplings, rear mount throttle connection, and an advanced valve pulse unit that operates with virtually no noise or vibration. The GraverMach has connections for two impact handpieces plus an auxiliary air connection for other air tools including the GRS Ultra 850 rotary handpieces.

The GraverMach now has an air output in the rear so it is now "Airtact ready". This is a direct hook-up to Airtact without using T-fittings.

Includes U.S. style IEC electrical cord plus Schuko adapter, foot control and multimount air filter. 100-240 Volt, 50-60 Hz. Handpieces sold separately; all GraverMax and GraverMate handpieces can be used with this machine Specifications:

Width - 5.2" (132mm) Height - .10.8" (274mm)

Requires compressed air 1.4cfm at 45 psi minimum (40 lpm. at 3 bar minimum). Compressor not included.

** If a customer orders Airtact to use with an older style GraverMax they will need one of the hookup kits.

Airtact ready

17. GraverMax® SC

The GRS GraverMax tradition continues with this new design. The new, economical GraverMax SC shares many features with the GraverMach including its new air porting technology, quiet operation and a more ergonomic and compact chassis. There are two main differences: the GraverMax SC uses a single stage precision air regulator in place of the dual-stage GraverMach regulator, and there is no throttle bias adjustment valve.

The GraverMax SC has been upgraded with the same dual-stage precision regulator that is in the GraverMach.

Includes U.S. style IEC electrical cord plus Schuko adapter, foot control and multimount air filter. 100-240 Volt, 50-60 Hz. Handpieces sold separately; all GraverMax and GraverMate handpieces can be used with this machine Specifications:

19. Handpieces - GraverMach / GraverMax SC

The patented GRS tool system is a breakthrough in speed, convenience and productivity. QC- Quick Change tools are first mounted in interchangeable "QC" holders. Tools can now be interchanged in a few seconds. Can be used with GraverMax / GraverMate.

#004-506 Hammer HP

High power tool designed for heavy metal engraving, sculpting and other demanding jobs.
Two jaw chuck holds round, square and standard gravers.

ITEM # 32-1171

#004-508 HP

Medium power. General purpose for jewelers and engravers. Two jaw chuck holds 0.06-0.14" round, square or standard gravers, 4.5" long. Wt. 3.8 oz.

ITEM # 32-1173

#004-609 Hammer HP

Great for stone setting, hammering and medium to deep engraving. Use with threaded hammer tip only. Includes one tip. 4.5" long. Wt. 5.5 oz.

ITEM # 32-1175

#004-610 Hammer HP

Stainless steel construction. Excellent for medium to deep engraving. Set screw chuck holds square tools max. 0.10" and round tools max. 0.13" diameter, 4.5" long. Wt. 5.5 oz.

ITEM # 32-1177

#004-710 HP- QC

Perfect for stone setting, hammering, medium to deep engraving. Stainless steel construction with quiet exhaust. Includes 6 QC holders 4.2" long. Wt. 5.9 oz.

ITEM # 32-1179

#004-720 HP- QC

Powerful impact handpiece. A great choice for very heavy metal engraving or hammering. Includes 6 QC holders. 5.0" long. Wt. 5.3 oz.

ITEM # 32-1181

#004-805 OC Hand Handle

Comfortable rubber-covered handle. Ideal for gravers and hand tools. Includes 3 QC holders

ITEM # 32-1183

QC #004-901 HP

Super high power with fine control. Comfortable compact shape with an adjustable side hose connection. Includes 6 QC holders, 2.6" long. Wt. 2.4 oz.

ITEM # 32-1185

QC #004-910 Package

Package includes 901 QC handpiece, QC hand handle, 9 QC tool holders, 6 steel points, 1 GlenSteel graver and QC tool Tray.

ITEM # 32-1187

QC #004-921 Monarch

"Monarch" is the finest impact handpiece for execution of ultrafine engraving including bulino and banknote styles. Includes 6 QC holders 2.4" long. Wt. 8 oz.

ITEM # 32-1189

#004-940 Magnum HP

Unmatched combination of power and control in a compact handpiece. Includes 6 QC holders, one palm and one oval knob. 2.8" long. Wt. 3.8 oz.

ITEM # 32-1190

Extra QC Holder

Fits on GRS gravers and inserts into QC holder

#004-804 32-1191 pk/3 #004-806 32-1192 pk/10

Gravermeister*

Gravermeister- the powerful impact tool. You need only electricity- the compressor is built-in. Precise pulses move a hammer piston back and forth inside the handpiece creating impact power. A foot pedal lets you vary the power as you work. The impact rate is adjustable from 1600 to 2400 impacts per minute. You can engrave deeply in steel and delicately in gold, set stones with confidence, texture metal quickly, sculpt stone and more.

Gravermeister #001-842

Includes compressor unit, foot control, four tools, instructions.

Specifications: 110 V / 60 Hz/ 7.0 Amp.

Handpieces not included.

35. 850 High Speed Rotary Handpiece

An ultra high speed rotary handpiece 320,000 rpm for effortless engraving, decorating and grinding of wood, metal, shell, plastic, glass, stones, almost any material. It is remarkably free from vibration and noise. No lubrication is required. Designed with a comfortable contoured shape to reduce fatigue. The ultra 850 accepts only 1/6" shank burs.

Includes handpiece, tubing, connectors, carbide bur and instructions. Requires 1.3cfm at 30-35 psi. (38lpm. at 2-2.5 bar) Connects directly to GraverMaxSC, GraverMach or any regulated air supply.

| ITEM # | DESCRIPTION |
|---------|---|
| 32-1351 | #004-850 GRS ULTRA HIGH SPEED 850 HANDPIECE |

36. Complete Ultra 850 Rotary System

Includes system stand, filter/regulator, pressure gauge, foot control, GRS Ultra 850 handpiece, handpiece storage station, bur storage station and hook-up hardware. System stand sits on any bench top or can be fastened to a wall or table leg.

| ITEM# | DESCRIPTION |
|---------|-------------------------------------|
| 32-1354 | #004-861 COMPLETE LILTRA 850 SYSTEM |

#004-863 GRS Foot Control for Rotary Air HP

Fits to GraverMax, GraverMate or any source of compressed air. Steel construction. Includes tubing and connectors.

| ITEM # | DESCRIPTION |
|---------|---------------------------|
| 32-1355 | #004-863 AIR FOOT CONTROL |

Burs for the **HS HP 850**

37. Carbide Bur Set

6-piece versatile carbide assortment for most metals, wood and general work. 0.062" (1.6mm) shanks.

| ITEM# | DESCRIPTION |
|---------|-------------|
| 32-1358 | #004-511 |

38. Diamond / Stone Bur Set

4 diamond and 2 stone burs especially for glass, stone and similar materials. 0.062" (1.6mm) shanks.

| ITEM # | DESCRIPTION |

| 32-1359 | #004-512 |

ENGRAVING

39. Microscope Meiji System

The GRS microscope has the right high quality optics for fine engraving. Magnified viewing lets you see clearly what your hands and tools are doing. Using this microscope, jewelers set every stone perfectly the first time..... even intricate settings with small stones.

#003-563NFB: Use with GRS Acrobat stand. Includes stereo zoom microscope body, 10X wide field eye pieces, 0.5 objective lens. Magnification range 3.5 to 22.5. Working distance 6" (150mm)

#003-563: Same as above but adds focus block needed for stand

#003-630: GRS Acrobat stand. Easy to position. Arms may be locked if needed. Includes headrest.

#003-584: Head rest kit for #003-563 microscope.

#003-541: GRS Positioning vise.

#003-616-V2: Turntable to reposition the work under the center of the microscope.

23. E-max High Speed Standard Set (Ring Type)

An ultra-precision rotary handpiece system that is user friendly. Features a digital display, a built in switch on the handle and an innovative vertical tower case which allows less footprint. Using an advanced coreless DC motor technology the E-max handpiece is smaller, lightweight and easier to maneuver. Increase the torque up to four times by addition of the speed reducer. This high torque and precise speed control gives goldsmiths the power for shaping, finishing and diamond fly-cutting.

Specifications:

• Rotation Speed: 1,000-35,000 rpm

• Power Source: 110V/ 60Hz

• Power Consumption: 30W

• Output Power: 71W

• Maximum Torque: 4.1N cm

GAUGES

0

1. Sliding Gauges

Convenient pocket sized sliding gauges in alloy, brass and plastic. Clear machine divided graduations. Useful for quick outside measurements in inch /metric of small parts or stones.

| ITEM # | DESCRIPTION |
|---------|----------------------------------|
| 35-1011 | SLIDE GAUGE ALLOY 50MM - GERMANY |
| 35-1012 | SLIDE GAUGE BRASS 60MM - GERMANY |
| 35-1013 | SLIDE GAUGE BRASS 80MM - GERMANY |
| 35-1014 | SLIDE GAUGE PLASTIC 80MM - SWISS |

3. Hi-Impact Dial Caliper

Made of high impact nylon, its lightweight elegant design makes it convenient for a variety of general applications.

Features an accurate dial reading display inch/metric.

| ITEM # | DESCRIPTION | |
|---------|-------------------------|--|
| 35-1021 | DIAL CALIPER -150MM/ 6" | |

5. Steel Vernier Caliper

A general purpose stainless steel vernier, with smooth sliding jaws, calibrated in both inch and metric measurements. Three way readings are possible: inside, outside and depth. Resolution 0.01mm.

| ITEM # | DESCRIPTION |
|---------|--------------------------|
| 35-1022 | STEEL VERNIER -150MM/ 6" |

Mitutoyo 2. Digimatic Caliper

An innovation in electronic measuring, this caliper uses high efficiency sensor technology. Engineered in hardened stainless steel for stability and durability. Features a digital readout in both inch/metric, resolution 0.0005"/0.01mm, with hold and zero functions. Additional hold down screw locks the jaw in position. Inside, outside and depth readings are possible.

| ITEM# | DESCRIPTION |
|---------|-------------------------------|
| 35-1026 | DIGIMATIC CALIPER -150MM / 6" |
| 35-1027 | DIGIMATIC CALIPER -100MM / 4" |
| 35-1028 | DIGIPA CALIPER -150MM/ 6" |

4. Digital Caliper- Value

An affordable digital vernier made in tough reinforced fiberglass. Exclusive thumb grip sliding jaw for rapid reading digital display. For inside or outside measurements in either inch or metric readings. Includes a zero reset function. Resolution 0.1mm.

| ITEM # | DESCRIPTION |

| 35-1023 | DIGITAL CALIPER VALUE -100MM/ 4" |
| 35-1024 | DIGITAL CALIPER VALUE -150MM/ 6" |

6. Flexible Ruler

| ITEM # | DESCRIPTION |
|---------|----------------------------|
| 35-1016 | FLEXIBLE RULER -6" / 15 CM |

7. C-Master Jewelry Gauge

A compact, highly accurate, digital gauge for easy stone measurement. The unit is provided with a twin gauge head that measures both inside and outside. Features automatic calculation of caratage. Measures from melee to taper with maximum reading of 25mm/1".

| ITEM # | DESCRIPTION |
|---------|-------------------------------|
| 35-1155 | C-MASTER JEWELRY GAUGE 0-25MM |

9. Pocket Digital Gauge

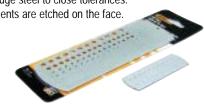

Precision pocket digital caliper with LCD display and zero re-set button. Maximum reading 25mm. Resolution 0.01mm.

| ITEM # | DESCRIPTION |
|---------|--------------------------------|
| 35-1157 | POCKET DIGITAL GAUGE 0-25MM/1" |

11. Drill Gauges

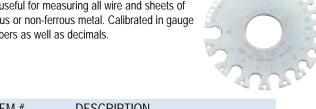

Made of heat treated heavy gauge steel to close tolerances. Hole sizes and decimal equivalents are etched on the face

| ITEM # | NUMBER SIZE |
|---------|--------------------|
| 31-1995 | DRILL GAUGE #1-60 |
| 31-1996 | DRILL GAUGE #61-80 |

13. Wire Steel Gauge-USA

Made of heavy gauge hardened and tempered steel and useful for measuring all wire and sheets of ferrous or non-ferrous metal. Calibrated in gauge numbers as well as decimals.

| 35-1032 WIRE STEEL GAUGE 0-36 GA | ITEM # | DESCRIPTION | |
|----------------------------------|---------|--------------------------|--|
| | 35-1032 | WIRE STEEL GAUGE 0-36 GA | |

8. Quick Mini Digital Gauge

An ingenious measuring device designed and crafted to the most exacting standards. Lightweight, ergonomic body, with large measuring faces, useful for both thick and thin parts. Clear digital readout with a maximum reading of 25mm/1" and a resolution of 0.01mm/ 0.0005".

| ITEM # | DESCRIPTION |
|---------|------------------------------------|
| 35-1151 | QUICK MINI DIGITAL GAUGE 0-25MM/1" |

10. Digital Gauge

A high precision palm sized digital gauge, with a super smooth sliding anvil. Gives a clear digital display in both inch or metric readings. Includes a zero re-set button. Maximum reading 25mm.

| ITEM # | DESCRIPTION |
|---------|--------------------------|
| 35-1159 | DIGITAL GAUGE- 0-25MM/1" |

12. Bracelet Gauge- France

An economical strap type gauge that easily adjusts to measure bracelets or other wrist jewelry. Calibration in 1/4" increments.

| ITEM # | DESCRIPTION |
|---------|----------------------|
| 35-1045 | BRACELET GAUGE 5"-9" |

14. Baker Gauge

The holes in this gauge are used to measure stones and the extensions are used to measure mountings. Gauge has millimeter and carat measurements.

| ITEM # | DESCRIPTION |
|---------|-------------|
| 35-1044 | BAKER GAUGE |

GAUGES

15. Degree Gauges - France

High precision degree gauges superbly constructed in extra fine quality steel. Graduations on a glare free surface ensure accurate readings. The combination degree gauge measures in both millimeters and lignes. Range 15mm and 6 lignes. 6½" in length.

| ITEM# | DESCRIPTION | |
|---------|-------------------------|------|
| 35-1051 | DEGREE GAUGE SINGLE-1/1 | оММ |
| 35-1052 | DEGREE GAUGE COMBINA | TION |

17. Moe Type Degree Gauge

A convenient way for quick estimates of carat weight without the need to remove stones from their settings. Measurement of the girdle diameter with a cross reference chart will indicate the weight.

| ITEM# | DESCRIPTION | |
|---------|--------------|--|
| 35-1060 | DEGREE GAUGE | |

19. Starrett[®] Dividers -Round Legs

Highly polished dividers made of spring steel with hardened, tempered and well balanced round legs. Floating washer and thumb screw allows fast and precise adjustment.

| ITEM # | DESCRIPTION |
|---------|-----------------------|
| 35-1034 | DIVIDER 3" ROUND LEGS |

21. Accurate Diamond Gauge

Pocket sized, aluminum gauge, provides the comparative size of gemstones in carats. Size range is 1 point to 2.1 carats. Estimates round, brilliant cuts and baguettes.

| ITEM # | DESCRIPTION |
|---------|------------------------|
| 35-1041 | ACCURATE DIAMOND GAUGE |

16. Pocket Degree Gauges

Lightweight, sensitive, stainless steel gauge for measurements up to 10mm with easy to read indices.

Wax gauge has rounded points.

Steel gauge has sharp points

Overall length 4".

| ITEM # | DESCRIPTION |
|---------|-------------------------------|
| 35-1057 | DEGREE GAUGE FOR WAX- 10MM |
| 35-1058 | DEGREE GAUGE FOR STEEL - 10MM |

18. Degree Gauges -German

Precision degree gauges in stainless steel with contrasting brass indices to enhance readability. Superior construction with return spring action ensures perfect accuracy.

| ITEM # | DESCRIPTION |
|---------|-----------------------------|
| 35-1054 | 0-10mm / 0.1mm -SMALL 4" |
| 35-1055 | 0-15mm / 0.1mm -LARGE 61/2" |

20. Jo-Di Gauge

Unique international sizing system. Measures diameter and width of four basic shapes: round, marquise, emerald and pear. High contrast black

anodized scale readings are to be compared with the reference booklet. Comes in a handy wallet.

| ITEM # | DESCRIPTION |
|---------|-----------------|
| 35-1068 | JO-DI GAUGE SET |

22. K & B Diamond Gauge

Flat, tempered aluminum pocket gauge measures loose or mounted stones ranging from three points to 4 carats. Handy birthstone chart on the back.

| ITEM # | DESCRIPTION |
|---------|---------------|
| 35-1042 | DIAMOND GAUGE |

23. Dividers - Square Legs

Heavy duty hardened and tempered steel with square legs that will not flex or bend. Sturdy spring pivot and a centrally located fine adjustment screw ensures precise setting over the entire range.

| ITEM # | DESCRIPTION |
|---------|-------------------------------|
| 35-1035 | DIVIDER 2½" - FRANCE |
| 35-1036 | DIVIDER 3" - GERMAN |

| 35-1047 | 5CM -OVAL |
| 35-1048 | 9 X 205CM -RECTANGLE |

28. Stone Millimeter Dial Gauges

A well designed gauge that provides an easy measuring system for single hand operation. Precision parallel measuring faces for rounds and baguettes in 0.1mm increments up to a maximum of 10mm.

Dial rotates for absolute zero setting.

For Gauges

29. Micromat Leveridge Type Gauge -USA

The most versatile measuring instrument for any jewelry appraiser or gem cutter. Estimates weight of diamonds mounted or loose. May also be used for other precious gems and pearls. Comes with high setting attachment and weight estimator. Includes an inside measuring system for rings.

Precision crafted for years of service.

| ITEM # | DESCRIPTION |
|---------|-------------------------------|
| 35-1141 | MICROMAT LEVERIDGE TYPE GAUGE |
| 35-1142 | BOOK & CASE |

31. Micrometer

An outside micrometer of the finest quality with a measuring range in inch and mm. Distinct figures and graduations on a non glare background permit easy reading. Measuring faces

are hardened and precision ground. Friction thimble and positive lock lever ensure reliable measurements.

| ITEM# | DESCRIPTION |
|---------|-------------------|
| 35-1017 | MICROMETER 0-25MM |
| 35-1018 | MICROMETER 0-1" |

33. Standard Flat Bands

Convenient, easy to use, accurate US standard sizes # 1- 15 including half sizes. Each band is clearly marked and colored for easy reading.

| ITEM # | DESCRIPTION |
|---------|---------------------|
| 35-1073 | STANDARD FLAT BANDS |

35. Wide Band Finger Sizer

A complete set of wide band ring sizers in bright nickel plated brass, each individually smooth finished. Sizes #1-15 including half sizes. Ideal for wedding band ring measurements.

| ITEM # | DESCRIPTION |
|---------|------------------------|
| 35-1077 | WIDE BAND FINGER SIZER |

30. Presidium[®] Gauges

Presidium® Dial Gauge:

Predictable accuracy. Read out measurement in millimeters and weight in carats simultaneously. Measures stones up to 23 mm in divisions of 0.1mm. Hardened wear resistant measuring surfaces. Includes a conversion booklet and a carrying case

Presidium® Digital Gemstone Gauge: Hi-tech, solid state circuitry eliminates miscalculation and gives direct digital read out up to one micron accuracy. Features include long life battery, zero reset and auto-off. Unsurpassed value for the discriminating jeweler.

by R. Allen Hardy and John J. Bowman UY K. Allen Flatuy and Julii J. Duwman

This book concentrates on jewelry engraving, with special and shock concentrates and shock concen emphasis on lettering, monogramming and ring engraving. emphasis on lettering, monogramming and may engraving.

Use of tools and proper work techniques are clearly described So you can learn to hand engrave jewelry yourself. 61-1114 (Softbound - 143 pages)

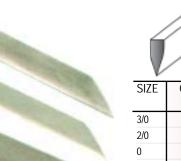

GRAVERS

1. E.C. Muller* Gravers- USA

High Speed: These gravers hold an edge up to five times longer than carbon steel gravers. Preferred for use on silver, gold, platinum and steel. May be modified for use with power assisted engraving systems.

Carbon Steel: Made of high grade steel. Suitable for use on metals such as copper, silver, gold and other alloys.

2. E.C. Muller® Straight & Bent Line Gravers

E.C. Muller® Line gravers are essential for performing various engraving techniques. The first number is the grade. For reference #6 is the smallest #32 is the largest. The second number is the number of lines that can be engraved at a time.

9. GRS® Thermo-Loc® Handles

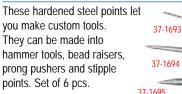

GRS Thermo-Loc handles are virtually unbreakable. Inside each handle is a formed piece of GRS Thermo-Loc that softens with heat. Insert the tool to the position you need and allow to cool.

The tool is secure and ready to use.

10. GRS® Tungsten Carbide Gravers TC outlast HSS gravers. They are harder than any

tool steel, but more brittle. Carbide tools need to be sharpened on a diamond lap.

11. GRS® Heat Treated Steel Points

TG Traditional Gravers

15. Line Gravers (High Carbon Steel)

For shading, florentine finishing, texturing, etc.

Sizes: First number is the width between lines, second is the number of lines.

Eg: 18-10 has 10 lines spaced 0.009" apart; 14-6 has 6 lines spaced 0.007" apart.

GRAVERS

28. High Speed Gravers- Red Tang

Made of the finest premium quality High Speed Steel. These gravers will hold an edge up to five times longer than carbon steel. Designed for professional use by jewelers and engravers. High speed steel gravers need to be sharpened on Arkansas stones to achieve a fine cutting edge. May be used by hand or modified for power assisted engraving.

Form Emphasis for Metalsmiths

NY MEIKKI SEPPA

An advanced manual on the techniques of metalsmithing.

An advanced manual on the techniques of metalsmithing. An auvanceu manuarun un une recumiques un merasimum.
Teaches you how to craft metal in terms of pure form. reacnes you now to crait metal in terms of pure form.

Discusses all the aspects of metal raising, sinking, stretching of terms.

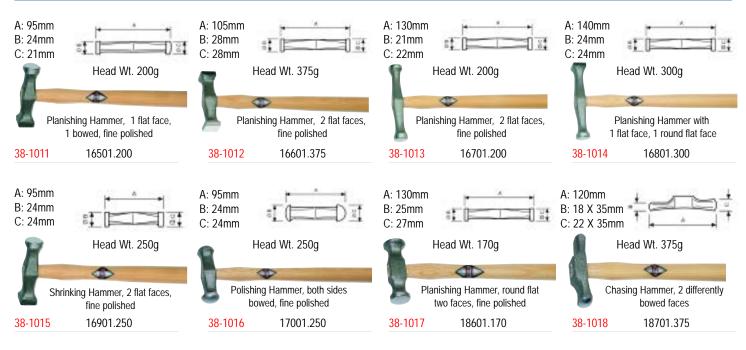

and fabricating. Includes an illustrated glossary to terms. by Heikki Seppa

61-1076 (Softbound - 146 pages)

HAMMERS

0

1. Picard Silversmith Hammers

PICARD Hammers

Superior forged steel heads for high performance and durability, all fitted with hickory handles. Specifically designed for all types of planishing, forming, raising and embossing. Widely used by jewelers and metalsmiths.

Made in Germany to DIN standards.

SHRINKING HAMMER: Also known as a dishing hammer. It is used to force metal into a surface that is curved.

PLANISHING HAMMER : Changes the metal surface through hardening. Faces of the hammer must be fine finished or it will leave surface impressions.

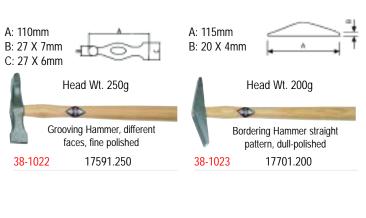

POLISHING HAMMER: A well balanced hammer with bowed and mirror finished faces. This feature is advantageous to goldsmiths.

EMBOSSING HAMMER : With repeated hammer strokes the metal is progressively moved from the back to form dimensional shapes.

CHASING HAMMER: Used to create a seamless form through compression with contraction without thinning the metal. Two rectangle faces; each longer than it is wide.

GROOVING HAMMER : Usually has both ends that taper to a vee. Better known as a forging hammer. When hammering it forces metal in opposite directions.

BORDERING HAMMER : Frequently used for working in confined areas, these hammers have narrow horizontal faces.

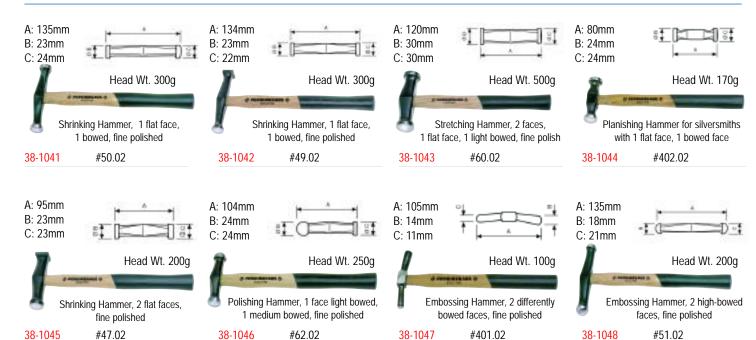

2. Peddinghaus Silversmith Hammers

mers. Drop forged steel hardened and ground with fine finished faces. All mounted with ash handles shaped for a comfortable grip. Select from a complete range for:

- Embossing Planishing Raising
- Grooving and Forming Riveting and Tinsmithing

Silversmithing and Art Metal

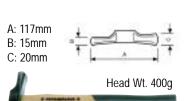

by Murray Bovin; Revised by Peter M. Bovin

38-1055

Hammering Surfaces

Silversmiths use a hardened steel surface to shape metal. Swage blocks, anvils and stakes are needed for this operation.

HAMMERS

3. Peddinghaus Gold and Silversmithing Anvils

Superior quality forming and raising stakes designed to fit the universal working block. Anvils and stakes are made in drop forged tool steel, hardened, ground and polished to a mirror finish. Made in Germany to DIN standards.

4. Dazor LED Diamond Lights

This truly revolutionary product provides a light source of superior quality. Unique models feature the DAZOR "floating arm" that is easily positioned with the touch of a finger. Rugged construction has no exposed springs or wires. Stands up to intensive everyday use by professionals.

Features:

- · Advanced illumination technology
- Delivers 5x the lumen density of a standard 5mm LED
- Color corrected light provides high quality light (5800-6500K°)
- Increased power with a 6-LED light source UV free
- · Dimmable down to 30% of full light output
- · Optics built into the LED's means no need to add or remove diffusers

7. Magna Deluxe Fluorescent Lamp

The Magna Deluxe lamp provides uniform light over maximum area. A built-in electronic ballast increases lumens.

REPLACEMENT BULB 9W

The unit is designed with a heavy-duty arm, concealed steel springs and smooth-glide tension control knobs.

Features:

39-1083

- A 55W fluorescent bulb enclosed in a 20" head
- The head swivels 310° and tilts 210° for maximum flexibility.
- · Comes with a separate table top base
- Includes 5' of power cord and clamp
- · UL approved.

9. Portable Flip Lamp- White Light

Especially for gems and jewelry, these lightweight, compact folding lamps are excellent for stone grading and color matching.

Features:

- · Adjustable positioning and an auto shut off when closed
- May be swiveled a full 360°
- A 13 W fluorescent bulb is included

10. UV Portable Lights

Key Chain Light: Produces a bright UV source of light to check fluorescence. Ultra Violet Light: UV light ideal for quick examination of fluorescence in diamonds and gem stones. Comes with batteries and case. Overall 41/2" long.

39-1212

| 39-1355 | 4X | BINOCULARS | 23MM |

A a

Achromatic: A lens which corrects for achromatic aberration, transmits light that forms images practically free from prismatic colors. Aplanatic: A lens which corrects for spherical

aberration & coma. Coma: A blurred appearance or hazy border surrounding an object viewed through a lens. Coddington: A corrected lens named after a British inventor. Magnifier: A lens that increases the apparent size of objects seen through it. It may be a single lens or a compound lens. Field of View: The higher the power the smaller the field of view. Focal Length: The distance at which a magnifier must be held away from an object to achieve clear focus. Power: This refers to the capacity in the lens to increase the image size, thus a 2X magnifier creates an image twice as large as that which the unaided eye sees at 10 inches.

31. Zeiss Professional Loupe

Pocket Magnifier for the professional. The aplanatic and achromatic design of the Zeiss lens system provides a field of view that is free of chromatic aberrations and distortion in the peripheral zone. The anti-reflective coating prevents glare. Comes in a leather pouch.

ELECTROLYTES FOR PLATING BATHS

RHODIUM J1: Brilliant white, very light coatings up to 0.3um layer

thickness for decorative applications. Especially suit able for jewelry, watches and spectacle frames.

May be used for rack and barrel plating.

RHODIUM J2: Brilliant white, very light coatings up to 0.3um layer

thickness for decorative applications. May be used for rack and barrel plating. Distinct advantages are no adhering hydrogen bubbles and no staining due to the

use of a special wetting agent.

RHODIUM TD: Ultra white bright coatings for decorative and technical applications. High deposition capacity, good covering

applications. High deposition capacity, good covering speed and excellent throwing power. May be used for

rack and barrel plating.

RHODIUM SL-C: Brilliant white, very light coatings up to 0.3um layer

Rack thickness for decorative applications. May be used

for rack and barrel plating.

RHODIUM 470: To achive blue rhodium coatings

Black For decorative coatings of blue to anthracite or deep

black color up to 0.3um thickness. Deposited coatings have a good color constancy and retain their brightness. To achive ideal result the bath make up 100 ml of black rhodium 470 and 20ml of black rhodium blackening agent are required for 1 liter of black rhodium bath to

deposit a blue color.

* 40-1216 & 40-1217 to be ordered together

Plating Anodes

An anode is a strip of metal of high purity that directs current from the positive terminal of the plating rectifier to the bath.

For more details see page #204

4. Karbo-Clear™ Rhodium Treatment Kit

Proper maintenance of your rhodium plating solution is essential to the production of a bright-white deposit. Wax or other stop offs and cleaners or soaps may introduce soluble organic contaminates into your Rhodium Plating Solution, which will cause a darkening of the rhodium deposit.

KIT CONSISTS OF:

- 1. TREATMENT TANK
- 2. ACTIVATED CARBON
- 3. GLASS STIRRER
- 4. FILTER PAPER
- 5. PLASTIC FUNNEL
- 6. FILTRATION TANK

| ITEM# | DESCRIPTION |
|---------|-----------------------|
| 40-1255 | RHODIUM TREATMENT KIT |

AURUNA^o 250, 261, 262, 263, 264

Pencil plating is used for partial plating of jewelry. With pencil gold-plating, small areas of parts are selectively gold-plated. Use a pen plater with a fiber tip point soaked with the respective gold bath.

Applications include decorative designs

in contrasting colors.

Fields of Application:

- Carat jewelry
- Costume jewelry
- Watches
- Spectacle frames
- Tableware Charms and Pendants Gold pens

5. Activated Carbon

A solution to remove organic contamination from rhodium and gold plating baths.

| ITEM # | DESCRIPTION |
|---------|------------------------|
| 40-1251 | ACTIVATED CARBON- 3 OZ |
| 40-1253 | FILTER PAPER 13" BX/10 |

Guidelines for Rhodium Plating

Rhodium plating baths need to be prepared in a clean and well ventilated area. To achieve an ultra bright white color articles must have a nickel underplate or the finish will be upsatisfactory. Use only platinized titanium angles

underplate or the finish will be unsatisfactory. Use only platinized titanium anodes when plating rhodium.

Rhodium solutions must be protected from every possible source of contamination. If a solution is contaminated proper adhesion will not occur. Poor adhesion may be due to plating at too high or too low a voltage. When rhodium solutions are not in use they should be stored in a glass beaker with a snug fitting cover.

PLATING

Unit Includes: Rectifier unit, red anode pen with fiber tip, black lead wire with clip, five regular fiber tips, one glass container and instructions. (Plating solution not included)

WIELAND

Wieland Gold and Rhodium plating baths are available. Call for details

8. Stop-off DYKEM Blue

A very effective solution that may be used to mask areas that do not need to be plated. May be cleaned after use with acetone.

| ITEM # | DESCRIPTION |
|---------|-----------------|
| 40-1197 | DYKEM BLUE 8 OZ |

6. Rhodinette Pen Plater

Suitable for both shop and industry. The ergonomically designed electrode pen ensures easy handling and the platinum contact guarantees consistent metal deposition. This fiber tipped pen may be used for partial electroplating of jewelry and other small items. It makes two tone effects much easier to produce and it is not always necessary to resort to masking areas.

| 40-1055 | NICKEL | 100ML |
| 40-1056 | COPPER | 100ML |

Guidelines for Electroplating

Electroplating is a process of metal deposition in a thin layer over an item of jewelry. Surface finish and cleaning is of utmost importance to get the best results in electroplating. It is the quality of finish prior to plating that

dictates the final appearance. From practical experience it is a known fact that all items after buffing and polishing must be immersed in an ultrasonic unit for at least 20 minutes. Subsequently the items must be steam cleaned before plating. When mixing plating solutions, always add salt to the solution. Never add water to the salt or concentrated solution.

Safety Instructions: • Work in a well ventilated and clean area • Wear proper eye and skin protection • Do not ingest or inhale fumes • All chemicals must be labeled and stored in tightly closed containers • Obey federal, state and local regulations for disposal of spent chemicals and waste

9. Plating Rectifier 30A with Micro Pen Plater

A unit that features both a plating rectifier and a pen plater.

Plating Rectifier: This is the power source for direct current that is needed for electroplating and electro stripping. Solid state circuitry delivers filtered DC output. A variable voltage and amperage determines the size of the bath and the surface area that can be plated. The control panel has an amp/volt meter, regulator and an on/off switch.

Micro Pen Plater: This is a built-in unit with a fiber tipped pen. It is designed to plate small and hard to reach areas in jewelry, designs and to touch up repairs.

| ITEM # | DESCRIPTION |
|---------|--------------------------------------|
| 40-1012 | RECTIFIER / PEN PLATER SET - 110V |

21. Krohn Liquid Electrocleaner

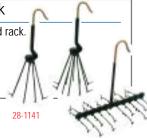

This ready-to-use electro cleaning solution is primarily used to clean castings and articles prior to being plated.

| ITEM # | DESCRIPTION |
|---------|-----------------------|
| 40-1191 | ELECTROCLEANER -1 QT. |

Umbrella Type Ring Rack

Stainless steel frame plastic coated rack. Hooks are adjustable and evenly spaced to hold articles of jewelry for cleaning or plating.
See page # 104

28-1143

Jax Metal Finishing Solutions These metal finishing, cleaning and polishing solutions are easy to use, produce consistent results and require no heat or electricity. All solutions are water based and non-flammable. Available on special order.

22. Krohn Rhodium Plating Solutions

Rhodium plated articles exhibit a hard, brilliant white, highly reflective surface. Care must be exercised not to use any stainless or ferrous metal articles as it will contaminate the bath. To plate silver, copper or bronze alloys, articles must first have a primary nickel plate. Use with platinized titanium anodes.

Rhodium Replenisher

Use this solution to replenish when the chemical balance is depleted in the rhodium plating bath.

| ITEM # | DESCRIPTION |
|---------|--------------------------------------|
| 40-1161 | RHODIUM 1/2G-8 FL. OZ (READY TO USE) |

24. Krohn Tivabrite

An electro stripping powder to be mixed with water (4 oz to a gallon) with an equal amount of sodium cyanide. The solution is used for stripping worn plating before replating.

Leaves yellow gold bright, clean and polished.

For chemicals please contact your supplier.

| ITEM# | DESCRIPTION | |
|---------|------------------|--|
| 40-1193 | TIVABRITE -1 LB. | |

25. Krohn Tivaclean

An electro cleaning concentrate for both metals and plastic. When Tivaclean is mixed with water (8 oz to a gallon) the color changes from orange to a fluorescent green. It contains an anti-foaming agent for low sudsing and a deodorant to suppress odor. It is biodegradable with a non-caustic pH of 9-10. Use at room temperature.

| ITEM # | DESCRIPTION |

Guidelines for Enameling

Enamels are available in lead free powder of 80 mesh particle size. It is important to pre-test the colors prior to using. Printed colors do not

always perfectly match the product they represent. There may be slight variations in color from batch to batch. The 80 mesh standard particle size is normally applied by sifting. It can also be mixed with water and charged on to a substrate surface. These enamels are for use on metals and glass. Normal firing temperature range is 1400°F.

30. Ceramitation - Low Temperature Hard Curing Resin

A remarkably versatile decorative resin that is full of vibrant color when cured. Its hardness is virtually equivalent to hard fired enamel. May be sprayed or brushed on almost any surface- metal, porcelain, glass or rock. Ceramitation may be thinned with a special thinner. This product is a two-part system, a) Color and b) Catalyst. Cures in 30-45 minutes at 200°F (120°C) in an electric oven.

| ITEM # | DESCRIPTION |

THE STATE OF THE S

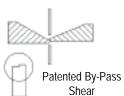

Series Premium Quality Shears

Speciality Micro Shear flush cutting action delivers an ultra precision edge on soft metals and soft wire. Manufactured from stamped alloy steel with induction hardened jaws.

A patented blade by-pass shear action results in a clean square cut edge.

This unique shear action contributes to an effortless operation. Features close fitting post and pivot screw. Light touch spring return and comfortable non-slip grips.

2. 410 Micro-Shears

4.8" long, jaws (9x12mm) premium grade. Optimized for work in high density areas. Reliable flush cuts for soft wire up to 20 ga. (0.8mm).

4. LX Micro-Shears

4.8" long, jaws (9 x 12mm). Slim tapered head for cuts in confined areas. Flush cuts for soft wire up to 19 ga. (1.00mm).

| ITEM # | DESCRIPTION |
|---------|-------------------------|
| 41-1012 | LX MICRO-SHEAR F/CUTTER |

Micro-Shear® Blade By-Pass Cutting Vs Compression Cutting

The term "Micro-Shear" refers to Xuron's patented method of blade by-pass cutting. Micro-Shear flush cutters, as opposed to traditional compression cutters, have cutting edges that are designed to by-pass each other rather than meet edge to edge. You can see the blade by pass if you examine the head of any shears with the tool in its fully closed position. The "shear cut" resulting from by-pass cutting blades produces a flat, clean flush-to surface cut end while reducing the manual cutting effort 50% as compared to "edge-to-edge".

1. 2175 Maxi - Shear

6" long, jaws (12 x 17mm). Features extra long tapered head for specific areas. Flush cut for soft wire up to 14 ga. (1.6mm).

Rouge Cloth

UY UPPI UNU dCTI.

The most thorough reference book available on traditional and innovative from the foundation techniques. Enabling continuous THE THUST INDIOUGN reference book available on traditional and innove tive jewelry-making techniques. Features contemporary works from two jewelry-making techniques. 277 illustrations etch by etch instructions and inhoractions. tive jewery-making rechniques. Features contemporary works from over 300 jewelers. 900 photos, 377 illustrations, step-by-step instructions alone and a detailed index tions, comprehensive glossary and a detailed index. A must-have book. 61-1016 (Hardcover – 840 pages)

1. Premium Platinum Rouge- Japan

A finishing compound, manufactured from carefully graded abrasive, blended with additives to give high reflective surfaces to precious metals, alloys and stainless steel. Priced by bar. Dimensions: 40 X 60 X 20mm.

| Green Rouge G-800: | General purpose cutting compound to eliminate scratches. | | 80G* |
|--------------------|--|-----------|-------|
| Green Rouge K 1: | Cut and color compound for all precious metals. | 42-1014 | 80G* |
| Green Rouge K 2: | Formulated specially for pre-polish of gold and silver. | 42-1016 | 80G* |
| Alox Cut 1: | Fast cutting compound for precious metals including platinum | . 42-1021 | 80G* |
| Alox Cut 2: | Suitable as a cutting compound for gold and silver. | | 80G* |
| Alox Cut 3: | Intermediate pre-polish to prepare for final finishing. | 42-1023 | 80G* |
| Alox-5 White: | Imparts an ultra shine with a distinctive luster - Small | 42-1025 | 80G* |
| | Large | 42-1026 | 320G* |
| Super Alox Gold: | A premium compound to provide a high luster on gold. | 42-1027 | 150G* |
| Super Alox Silver: | Imparts an excellent reflective surface on silver. | 42-1028 | 150G* |

^{*} Weights are approximate. See note below. Refer page #68 for use of KOYO Polishing Compounds

2. Platinum Rouge- Japan

A selected grade of polishing compound formulated for ultra bright finishing of platinum.

Uniformly blended and manufactured under strict quality control. Exceptional adherence to buffs, brushes or felts. Different grades to achieve surfaces from matte to super shine. Priced by bar.

| Gray N-500 : | Fast cutting compound to smooth the surface after casting. | 42-1031 | 350G* | |
|----------------|---|---------|-------|--|
| Gray NW-800 : | Soft cutting compound to improve the surface. | 42-1032 | 420G* | |
| White NW-1500: | Medium cutting compound prior to pre-polish. | 42-1033 | 80G* | |
| White NW-4000: | A finer cutting compound to remove hair line scratch marks. | 42-1034 | 400G* | |
| White NW-6000: | A pre-polish for final finishing of platinum and titanium | 42-1035 | 340G* | |
| White NW-8000: | Elevates the surface to an ultra shine. | 42-1036 | 450G* | |

^{*} Weights are approximate. See note below

3. Pica Platinum Rouge - Japan

| The only compound | The only compound for unsurpassed finish on platinum. Priced by bar. | | | | |
|-------------------|--|---------|-------|--|--|
| Pica Blue : | , , | 42-1041 | 350G* | | |
| Pica-Ace Pink : | Imparts an excellent reflective surface on platinum and titanium. | 42-1042 | 350G* | | |

^{*}Weights are approximate. See note below

4. Dialux Polishing Compounds

A select type of super soft abrasive, uniformly blended with a carrier wax. These compounds have a special formulation for good adhesion to buffs or felt wheels. Only minimal amounts need to be used. Bar size 4" x 1½" x 1½". Priced by bar.

| Green Dialux: Medium cutting compound for chrome and stainless steel. 42-1052 4 OZ. White Dialux: For reflective polishing of silver and silver alloys. 42-1053 4 OZ. Blue Dialux: A general purpose polishing compound for all metals. 42-1054 4 OZ. Orange Dialux: Leaves a high degree of finish on soft metals. 42-1055 4 OZ. |
|--|
| Blue Dialux: A general purpose polishing compound for all metals. 42-1054 4 OZ. Orange Dialux: Leaves a high degree of finish on soft metals. 42-1055 4 OZ. |
| Orange Dialux: Leaves a high degree of finish on soft metals. 42-1055 4 OZ. |
| |
| |
| Yellow Dialux: Recommended for a bright finish on brass, bronze and copper. 42-1056 4 OZ. |
| Gray Dialux: Best for producing a reflective finish on stainless steel. 42-1057 4 OZ. |

NOTE: All polishing compounds have different agents blended together with a binder. Therefore, the densities being different, the weights vary accordingly.

5. Menzerna® Rouge

A unique type of rouge formulated with a blend of soft abrasive and a bonding agent. Generates a balanced cutting action and extends well, so that just a small amount of compound is needed. Priced by bar.

34. Quatro[®] Stand Up Polishing Unit

State of the art polishing unit designed to catch all of your gold and other precious metals.

- The most efficient polishing station on the market
- · A filtration system that captures all the gold
- Filter efficiency 99.7% on particles 0.3 microns and larger
- · Clear view enclosure provides maximum work area
- Inlet below the wheel maximizes gold recovery

Basic Model: JR-1X2-B

- · A single station polishing unit that is workplace friendly
- Optional ClearView enclosure for all precious metals
- · Unit contains dust filter on one end
- · Maximum Free Air: 600CFM
- Dimensions: 19" x 18" x 44" Wt. 90 lbs

Deluxe Model: JR-1C2-B

- A new single station ClearView design
- · Cool clean continuous operation
- · Capture your gold inside a bag and send it for refining
- · Maximum Free Air: 600CFM
- Dimensions: 20" x 24" x 50" Wt. 95 lbs

Double Head Model: SPU-2X4-BA

- Two separate air streams, two separate metals are contained in separate bags
- · You can polish gold on one side and platinum on the other
- Three stage filtration to maximize precious metal collection
- Maximum Free Air: 1200CFM
- Dimensions: 40" x 20" x 53" Wt. 175 lbs

35. Quatro® Jet Stream- Clean Air

- Specifically designed for jewelers
- · Compact space saving unit
- · Ultra quiet performance
- · Infinite speed control
- · Anti-microbial deluxe filter bag
- HEPA filter
- Unit Includes: Two 4ft hose lengths, 2 adapters and dual inlet
- Dimensions: 10%" X 14%" X 12%"
- Wt. 28 lbs

ROLLING MILLS

Rolling Mills

- · High quality, sturdy, one piece frame construction
- · All steel gear driven rolls can be aligned, raised and lowered
- · Alloy steel rolls run in lubricated ball bearings
- Hardened to 62-64 Hrc and surface finished to less than 0.1 um
- · Calibrated dial indicates reduction in the sheet size

<u>8. Filly 140 / 160</u>: The Filly 140/160 is a highly flexible machine, configurable for both wire and strip production, with a choice of 140mm and 160mm working tables.

Wire and Strip combinations are available for both 140mm and 160mm working tables for both heads.

All Strip machines supplied with a 160mm table for breaking down, have Mirror Finished Cylinders fitted as standard to a 140mm table for finishing.

All Wire machines are available only in a 160mm working table format, with a single wire coiler unit provided as standard.

Gold Scales-Legal for trade

METTLER TOLEDO offers an extensive line of balances that meet Legal for Trade specifications. Jewelers who work with precious metals will have complete confidence in precision, dependability and accuracy.

FACT- Accuracy -The Fully Automatic Calibration Technology initiates the internal adjustment of your balance whenever temperature changes risk affecting the accuracy of your weighing results.

Integrated Applications - All jewelry balances have the most important applications integrated: normal weighing, piece counting and % weighing.

Back-lit Display- This display on all jewelry balances guarantees that results can be easily and securely read. For you - and a second display for your customer.

Performance Guaranteed - Rely on the best - all Mettler Toledo balances are made in Switzerland.

1. Prong Lifting Pliers

Special lap joint pliers with a double leaf spring. Provides gentle pressure on the prong and no pressure on the stone to avoid mar or fracture.

One jaw is grooved to hold the prong and the other angled to support the under side to raise the prong gently.

| ITEM # | DESCRIPTION |
|---------|------------------------|
| 41-1245 | PRONG LIFTING PLIER-5" |

2. Prong Opening Plier

Open prongs without fracturing stones. The upper angled jaw has a claw and the lower jaw a groove. The prong is supported at the base to avoid pressure on the top of the stone. Features box joint, double leaf springs and a cushion grip.

| ITEM # | DESCRIPTION |
|---------|---------------------|
| 41-1141 | PRONG OPENING PLIER |

3. Prong Closing Plier

Single squeeze action closes opposite prongs over stones. Bent jaws with grooved ends securely hold prongs. Features perfectly aligned jaws, double leaf springs and a cushion grip.

| ITEM # | DESCRIPTION |
|---------|---------------------|
| 41-1142 | PRONG CLOSING PLIER |

4. Burnishers

Micro-grained, super hard tungsten carbide will smooth and finish all metals including platinum. Silver or gold will not adhere to this burnisher.

| ITEM # | DESCRIPTION |
|---------|------------------------------------|
| 23-1071 | TUNGSTEN CARBIDE 5/32" Ø - 8"L |

| 23-1076 | STEEL ¼" Ø BRASS HANDLE LG- 8"L |

5. Setter's Tube Holder

Comfortably shaped wooden handle has reinforced metal threaded spindle with chuck. Accepts interchangeable collets to hold tubes during stone setting. Sizes from 1/s2" to 1/k". (7 collets)

| ITEM # | DESCRIPTION |
|---------|----------------------|
| 49-1011 | SETTER'S TUBE HOLDER |

6. Peg Clamp Holder

Hand held holder with moveable pins to hold any odd shaped parts. Remove handle to fit in a vise. Useful when engraving and setting.

| ITEM # | DESCRIPTION | |
|---------|------------------|--|
| 23-1059 | PEG CLAMP HOLDER | |

7. Tennis Bracelet Holder-Deluxe

All metal clamp, secures bracelet easily, eliminating the use of shellac. A relief on the diameter provides a space to nest the clasp.

| ITEM # | DESCRIPTION |
|---------|------------------------------|
| 23-1061 | BRACELET HOLDER - 31/4" DIA. |

8. Margin Rollers

Individually sized burnishing tool that effectively removes porosity, pits or scratch marks on the inside of rings and bracelets.

| ITEM # | DIAMETER | SHANK |
|---------|----------|--------------------|
| 23-1131 | 8 MM | 3/ ₃₂ " |
| 23-1132 | 10 MM | 3/32" |
| 23-1133 | 12 MM | 3/32" |

9. Double-Ended Steel Tracer

A hardened steel scribe with precise sharpened points at both ends. Highly accurate for marking layout work when designing.

| ITEM # | DESCRIPTION |
|---------|-------------------------|
| 23-1083 | DOUBLE END TRACER-41/2" |

10. Burnishers-Steel

Polished, straight or curved steel blade, with comfortable hardwood handle. These tools may be used to open or close bezel settings in hard to reach places. Overall length 6".

| ITEM # | DESCRIPTION | LENGTH |
|---------|-----------------------|--------|
| 23-1111 | STRAIGHT- 13/4" BLADE | 6" |
| 23-1112 | CURVED - 2" BLADE | 6" |

11. Bezel Mandrel- USA

Quite simply, the fastest way to form bezels in different shapes. May also be used to make decorative wire forms. These mandrels are made of case hardened steel, precision finished and polished. Mandrel portion is approx. 8" long with a $\normalfont{h}"$ to \normalfont{h} to $\normalfont{h$

| 23-1263 | PEAR |
| 23-1264 | TAPERED SPINDLE |

0

16. Bezel Pusher

Square faced, hardened and polished steel pusher, mounted in a hardwood handle. Use for the initial tightening of prongs and beads.

| ITEM # | DESCRIPTION |
|---------|--------------|
| 49-1015 | BEZEL PUSHER |

17. Prong Pusher

A quality tool having a comfortable wood shaped handle with a grooved steel end. Use to push prong or crown points with unfailing accuracy.

| ITEM # | DESCRIPTION |
|---------|--------------|
| 49-1016 | PRONG PUSHER |

18. Bezel Roller

Effortless method for rolling bezels around stones in rings. The semi circular highly polished steel head gently folds the metal over the stone.

| ITEM # | DESCRIPTION |
|---------|--------------|
| 49-1019 | BEZEL ROLLER |

19. Prong Lifter

This new design has the advantage of opening cabochon with the additional feature of a prong pusher. Titanium coating is five times harder than steel and has a long life. Comes with a comfortable

| ITEM # | DESCRIPTION |
|---------|-------------------------------|
| 49-1021 | PRONG LIFTER -REGULAR |
| 49-1022 | PRONG LIFTER -TITANIUM COATED |
| 49-1023 | PRONG LIFTER -VALUE |

20. Final Touch

Extremely easy to use for setting stones. Snap in prongs with a single light tap. The polyurethane base has numerous cavities to locate various stone sizes during setting.

| ITEM # | DESCRIPTION |
|---------|-------------|
| 49-1027 | FINAL TOUCH |

21. Claw Setting Jig - Swiss

A complete set for making four, six or eight large or small prongs. Filing or sawing may be done while the setting is held in the jig.

| ITEM # | DESCRIPTION |
|---------|------------------|
| 49-1028 | CLAW SETTING JIG |

22. Ring Setter's Flanges

A set of brass flanges in pairs to clamp wide or narrow band ring sizes #(1-15) in a vise without any mars. Useful for setting, engraving or repair work.

23. Channel Setting Set- for Faro Handpiece #10

Incorporate this precise system to set stones professionally. A complete set that fits to the handpiece and allows you to control the cutting depth for channel set stones. This kit ensures stones are set straight, parallel and firmly in place.

Handpiece not included

| ITEM # | DESCRIPTION |
|---------|---------------------|
| 49-1031 | CHANNEL SETTING SET |

24. Inside Ring Setter's Set - Original

A universal tool that allows all around accessibility for setting. Nine nylon inserts cover the entire range of ring sizes from #2-13. The head unscrews for alternative mounting in a vise.

Special Bench Pin: Use this bench pin with the setters inside ring clamp. This fixture provides access to all around workability, contributing to higher productivity.

29. Beading Tool Sets

Steel tool has concave tip that puts beads on prongs to secure stones in mountings. Set of 12 from #5-16 (0.5 to 1.05mm). Set of 23 from #0-22 (0.25 to 1.35mm). All on plastic stands with a handle.

| ITEM# | DESCRIPTION |
|---------|-------------------------|
| 49-1131 | BEADING TOOL 12 PCS SET |
| 49-1132 | BEADING TOOL 23 PCS SET |
| 49-1135 | BEADING TOOL HOLDER |
| 49-1136 | BEADING TOOL ORGANIZER |

31. MILLrite - Millgrain Machine

A precision machine to create professional decorative designs on rings, sizes #2-13. Includes a work holding device, a tool clamp, and an ingenious tool positioning system. Easy to operate with minimal effort. Imprinted designs exhibit a high degree of brilliance.

Use with lathe millgrain tools. See details on page #236

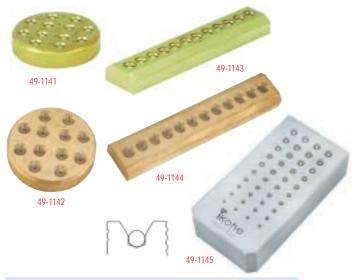

| ITEM # | DESCRIPTION |
|---------|------------------------|
| 43-1131 | * COMPLETE MACHINE |
| 39-2019 | PORTABLE WORKLIGHT LED |

* Worklight not included

30. Beading Blocks -Imported

Precision formed round or rectangular shapes in hardened polished tool steel. These blocks are essential to re-shape the ends of beading tools.

| ITEM # | DESCRIPTION |
|---------|-------------------------------|
| 49-1141 | SUNK-ROUND-12 HOLES -FRANCE |
| 49-1142 | RAISED-ROUND-12 HOLES -FRANCE |

| 49-1145 | 40 HOLES (0.60-1.75MM) -SWISS |

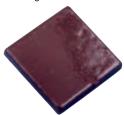

32. Hardwood Shellac Holders

Shellac holders are available in round, flat face and rotating types. This hand held accessory holds the work piece while chasing, setting and engraving. Surfaces may be bonded with heated shellac to retain the article. The rotating wheel type may be locked in any position by a wing nut to allow viewing. To remove articles dissolve in denatured alcohol.

| ITEM # | DESCRIPTION |
|---------|--------------------------|
| 49-1151 | ROUND 4"- COATED SHELLAC |
| 49-1152 | ROUND 5"- COATED SHELLAC |
| 49-1156 | FLAT FACE-1½" |
| 49-1157 | FLAT FACE-2" |
| 49-1159 | BRACELET HOLDER |

33. Stone Setter's Cement

Forms an excellent bond for stones when melted and applied to dops. Securely holds the stone for polishing and finishing.

| ITEM # | DESCRIPTION |
|---------|----------------------------------|
| 49-1217 | SETTER'S CEMENT- 4" X 4" X 5/16" |

35. Jett Sett®

An easy to use thermoplastic formulated compound that becomes pliable when placed in warm water. Hardens in a few minutes. What's more, it adheres to smooth surfaces and can be softened and re-used. Increase your efficiency by creating special devices and supports, for holding, setting and engraving any jewelry items. Use the Little Dipper pot for controlled heat when working with Jett Sett.

Jett Sett Tools

Threaded Handle Tool: Used for holding cup fixtures at any angle. Cup Fixtures: Three sizes and screws on to the handle tool. Flat Fixturing Tool: Accommodates several pieces of jewelry for production. Multi Bracelet Fixturing Tool: For holding bracelets while setting.

| ITEM # | DESCRIPTION |
|---------|--------------------------------|
| 49-1251 | JETT SETT PLASTIC - 1 LB. BAG |
| 49-1254 | THREADED HANDLE TOOL |
| 49-1255 | FLAT FIXTURING TOOLS |
| 49-1256 | MULTI BRACELET FIXTURING TOOLS |

| 49-1261 | RING TOOL HOLDER |
| 50-1136 | LITTLE DIPPER POT-110V |
| | |

34. Shellac Flakes & Sealing Wax

Very useful for securing odd shaped articles of jewelry when stone setting. Shellac becomes soft with application of heat, and hardens with cold water. Release articles by dissolving in denatured alcohol.

| ITEM# | DESCRIPTION |
|---------|---------------------------------|
| 49-1211 | SEALING WAX - STICK 1 LB USA |
| 49-1212 | SEALING WAX - STICK 1 LB DELUXE |
| 49-1213 | SHELLAC FLAKES 1 LB |

37. 3M° Glue Gel

A fast curing gel, bonds in a minute, and is very easy to apply. Needle tip dispenser fills small voids and forms a strong bond. Useful to bond jewelry, glass, stone, plastic and wood.

| ITEM# | DESCRIPTION |
|---------|---------------------|
| 49-1221 | SUPER GLUE GEL-6001 |
| 49-1222 | SUPER STRENGTH-6004 |

39. 3M° Quick-Fix Adhesive -08155

A fast bonding adhesive that has excellent resistance to temperature extremes. Bonds rubber, glass, metals, vinyl and plastics.

| ITEM # | DESCRIPTION |
|---------|--------------------------|
| 49-1223 | QUICK FIX ADHESIVE-1 OZ. |

41. Attack® Epoxy Solvent

A solvent to separate bonded items by disolving epoxy without affecting the base material.
Useful on metal, glass, wood and other materials.

| ITEM # | DESCRIPTION |
|---------|---------------------------|
| 49-1236 | ATTACK® EPOXY - 8 FL. OZ. |

36. Devcon® Epoxy

High strength two part epoxy. Clear, non-shrink formula. Sets in five minutes and achieves full strength in one hour. Use to bond wood, glass, stone, crystal and ceramics. Available in a tube dispenser or dual pack.

| ITEM # | DESCRIPTION |
|---------|-------------------------------|
| 49-1228 | EPOXY/HARDENER 1 OZ. TUBE |
| 49-1229 | EPOXY/HARDENER 1 OZ. DUAL PK. |

38. Epoxy 220/330

Epoxy 220: A heat resistant epoxy for bonding findings to stone. Has a higher tensile strength. Air curing time approx. 8 hours. Low heat reduces curing time. Epoxy 330: A clear epoxy for invisible bonds on glass, stone, or findings. Exhibits a high polish on inlay work. Air curing time approx. 2 hours. Apply light heat to reduce curing time.

| ITEM # | DESCRIPTION | |
|---------|-------------|--|
| 49-1225 | EPOXY 220 | |
| 49-1226 | EPOXY 330 | |

40. Crystal Cement

A crystal clear adhesive for setting gemstones and watch crystals. Fine tip control for accurate application. Net wt. ½ oz.

| ITEM # | DESCRIPTION |
|---------|----------------|
| 49-1227 | CRYSTAL CEMENT |

42. Opticon® Fracture Sealer

A two part epoxy that penetrates hair line cracks, and is very effective for sealing fractures in stones. 8 fl oz sealer, 1 oz hardener.

| ITEM # | DESCRIPTION |

Covers and inustrates basic techniques of soldering, casting, wire-drawing, polishing, sawing and

61-1221 (Hardcover – 193 pages)

1. Cyber-Therm Tweezers

Unique tungsten steel alloy withstands temperature up to 3000°C for 5-10 minutes. Handles protected by insulating sleeves of heat resistant rubber.

| ITEM # | DESCRIPTION |
|---------|--------------------|
| 56-1148 | CYBER THERM- 145MM |

3. Soldering Tweezers

Cross locking stainless steel tweezers with serrated tips and fiber handles, to protect hands from heat when soldering. Overall length 63/4".

| ITEM # | DESCRIPTION |
|---------|-----------------------------|
| 56-1241 | SOLDERING TWEEZER -STRAIGHT |
| 56-1242 | SOLDERING TWEEZER -BENT |

5. Ceramic Tweezers - for Platinum

High quality, <u>non-magnetic</u>, <u>anti-static</u>, light weight aluminum body tweezers. Indispensable when soldering or working with platinum jewelry.

| ITEM # | DESCRIPTION |
|---------|-------------------------|
| 56-1146 | CERAMIC TWEEZERS |
| 56-1147 | CERAMIC TIP ONLY (PAIR) |

7. Solder Free Tweezers

Swiss made, anti-magnetic, <u>acid resistant tweezers</u>. Will not contaminate solder flux. Solder will not adhere to the ends. Size 61/2".

2. Solder Pics - Tungsten / Titanium

Non-stick tungsten and titanium tips are used to prevent solder from adhering. Durable, long lasting with a wooden handle.

50-1011: Tungsten tip for platinum soldering.50-1012: Titanium tip for gold and silver soldering.

4. Ring Soldering Tweezers

Made of stainless steel with a serrated base and slide lock. Ideal for holding shanks and settings in position when soldering.

| ITEM # | DESCRIPTION |
|---------|---------------------------|
| 56-1151 | HEAD AND SHANK -SWISS |
| 56-1295 | HEAD AND SHANK -VALUE |
| 56-1231 | INSIDE R/HOLDING TWEEZERS |

6. Ceramic Ring Stand

Ceramic tapered rod on a heavy base to suit all ring sizes. Mounted on a universal base to position the article at any angle.

| ITEM# | DESCRIPTION |
|---------|-------------------------|
| 50-1015 | HOLDER WITH BASE |
| 50-1016 | REPLACEMENT CERAMIC ROD |

8. UV filter for Third Hand Base

Mount this UV filter on the arm of the third hand base (50-1021), see page-#45. Then set it to any desired position. This will provide adequate protection

when soldering.

| ITEM# | DESCRIPTION | |
|---------|-------------|--|
| 50-1024 | UV FILTER* | |

^{*} UV filter is to be used with third hand base 50-1021 see page #45

9. Third Hand Holders

50-1021: This third hand base and arm has various uses. It may be used with a tungsten tip for soldering or a UV filter for eye protection. Individual parts must be ordered separately.

50-1028: An all <u>stainless steel third hand</u> with a weighted base and ball joint tungsten tips to position work at any angle.

| ITEM# | DESCRIPTION |
|---------|---|
| 50-1021 | THIRD HAND BASE AND ARM ONLY * |
| 50-1022 | TUNGSTEN TIP * |
| 50-1028 | THIRD HAND SS DOUBLE TUNGSTEN TIP-BAR TYPE |
| 50-1029 | THIRD HAND SS DOUBLE TUNGSTEN TIP-FLEX TYPE |

^{*} Tungsten tip is to be used with third hand base 50-1021

10. Third Hand Holders-Round Base

Useful accessory that positions work pieces during soldering. Select a complete unit or just the base or tweezers.

Double Clamp Stand: Heavy work base with universal adjustment. Hands hold parts in place to simplify soldering.

| ITEM# | DESCRIPTION |
|----------|-----------------------|
| | |
| 50-1031 | THIRD HAND W/TWEEZERS |

11. GRS® Third Hand Soldering Stations

The ultimate work station for all your soldering applications. Mounted on a metal base with a replaceable non-asbestos working platform. Chose from two styles; single third hand or double third hands.

#004-570: Includes two removable standard third-hands and 6" square solder board. Sits on a bench or attaches to BenchMate.

 $\mbox{\#004-545:}$ Includes two short third-hands and $6\mbox{''}$ square solder board.

#004-691: For platinum or other high-temp work; 6" square.

#004-097TUNG: For other high-temp work including platinum.

(Torch is not included)

12. Rotating Soldering Table with Third Hand

This rotating soldering table includes an added feature of two third hands for positioning of work pieces. Both third hands have tungsten tips. An accessory for holding the Little Torch is available. See page # 269. Table is $8^{1}k^{\prime\prime}$ in diameter.

| ITEM # | DESCRIPTION |
|---------|-------------------------|
| 50-1066 | S/BOARD WITH THIRD HAND |
| 50-1067 | SOLDERING BOARD ONLY |

13. Rotating Soldering Table

Allows convenient positioning at any angle as the table revolves on ball bearings. Low height and special honeycomb design provides firm holding of small parts. 51/2" diameter.

| ITEM # | DESCRIPTION |
|---------|---------------------------|
| 50-1061 | SOLDERING TABLE -COMPLETE |
| 50-1062 | REPLACEMENT LAVA DISC |

16. Ceramic Soldering Blocks

Non-asbestos blocks, suitable to withstand high temperatures up to $2000^{\circ}F/1093^{\circ}C$ with little or no thermal expansion.

A flat working surface that retains heat and cleans easily.

| ITEM # | DIMENSIONS | TYPE |
|---------|--------------------------------------|-------|
| 50-1071 | 6½" X 3" X 1" | OVAL |
| 50-1072 | 4 ¹ / ₂ " X 1" | ROUND |

14. Honeycomb Soldering Blocks

Most commonly used ceramic block, that has fine pores to accelerate the heat loss from parts being soldered. Holes may be used to retain fine wire articles or used as anchor points. Asbestos free, these blocks withstand temperatures up to 2000°F.

17. Soldering Boards for Platinum

Made of super refractory material, these boards meet the demand of high temperature soldering of platinum. Extremely low thermal conductivity without loss of strength, these boards are free of any metallic impurities.

| ITEM # | DIMENSIONS | |
|---------|--|--|
| 50-1074 | $3^{3}/_{4}^{\prime\prime}$ X $5^{1}/_{2}^{\prime\prime}$ X $^{1}/_{2}^{\prime\prime}$ | |
| 50-1075 | 51/2" X 73/4" X 1/2" | |

| ITEM # | DIMENSIONS | |
|---------|---------------------|--|
| 50-1086 | 4" X 4" X ½" | |
| 50-1087 | 6" X 6" X ½" | |
| 50-1088 | 5" X 5" X ½" -JAPAN | |

15. Silquar Hi-Heat Boards

A non-asbestos soldering board. Withstands heat to a maximum temperature 2000°F/1093°C. Cleans easily with water.

| ITEM # | DIMENSIONS |
|---------|----------------|
| 50-1081 | 6" X 6" X 1/2" |
| 50-1082 | 6" X 12" X ½" |
| 50-1083 | 12" X 12" X ½" |

18. Solderite™ Boards- Asbestos Free

An entirely new material that is asbestos free, flame resistant and non-combustible. These boards have good heat reflection and insulating qualities. In addition, they will not flake or crumble, making it the best all purpose soldering board.

| ITEM # | DIMENSIONS |
|---------|----------------|
| 50-1091 | 6" X 6" X 1/2" |
| 50-1092 | 6" X 12" X ½" |
| 50-1093 | 12" X 12" X ½" |

19. Charcoal Block

Made from selected soft wood. Easy to pin or press work pieces while soldering. Creates a reducing atmosphere and reflects heat back on the article being soldered.

| ITEM # | DIMENSIONS |
|---------|-----------------------|
| 50-1101 | 51/2" X 23/4" X 11/8" |

20. Silica Soldering Board

A novel type of board that is soft and flexible, yet will not break if dropped. Useful to hold a variety of different articles.

Withstands temperatures up to 2500°F.

| ITEM # | DIMENSIONS |
|---------|--------------|
| 50-1117 | 6" X 6" X ½" |

21. Picklers

Picklers provide a safe and effective method for removing oxides or fire scale from the surfaces of precious metals.

50-1131 / 50-1132: Includes an acid resistant retrieval basket.

Constant bath temperature at 140°F/60°C.

50-1136: A low cost pickle pot.

50-1131 / 50-1132

| ITEM # | DESCRIPTION |
|---------|--|
| 50-1131 | IKOHE PICKLER- (14 OZ) 110V/60HZ |
| 50-1132 | IKOHE PICKLER - (14 OZ) 220V/ 50HZ |
| 50-1136 | LITTLE DIPPER PICKLER (16 OZ) -110V/60HZ |
| 50-1137 | PLASTIC BASKET FOR 50-1131 |

22. Copper Tongs

These tongs are suitable to use when immersing articles in pickling or acidic solutions. Will not contaminate or corrode the solutions. Overall length 9".

| ITEM # | DESCRIPTION |
|---------|-------------------------|
| 50-1118 | COPPER TONGS -BENT |
| 50-1119 | COPPER TONGS -FISH TAIL |

23. Magnesia Block

An economical type block that is porous and fireproof. Lasts longer than charcoal blocks. Soft enough to enable work to be pressed into the surface and steadied while soldering.

| ITEM # | DIMENSIONS | |
|---------|---------------|--|
| 50-1122 | 6" X 3" X 1½" | |

24. Thermic Isolator Grain

Granular, irregular shaped grains used to support work pieces during soldering. May be used wet or dry. Indispensable when soldering unusual shapes of jewelry items.

| ITEM # | DESCRIPTION |
|---------|---------------------|
| 50-1121 | SOLDER GRAINS- 500G |

25. SPAREX® Pickling Compound

Non-flammable, granular dry acid compound, for use in Picklers. Cleans and removes surface oxidation and fire scale discoloration, on gold, silver and non-ferrous alloys. Works efficiently at a constant temperature of 140°F/60°C.

| ITEM # | DESCRIPTION |
|---------|---------------------|
| 50-1141 | COMPOUND 21/2" LB |
| 50-1142 | COMPOUND 10 OZ. |
| 50-1143 | COMPOUND 45 LB DRUM |

26. Binding Wire-Iron

For binding various items together, may be used during soldering.

| ITEM # | GAUGE | INCH | WEIGHT |
|---------|-------|-------|--------|

27. Tix Solder Products

Tix Solder: A specially prepared solder that adheres easily to all solderable materials. Melts at 275°F. It has extraordinary bonding strength, stays bright and will not tarnish. Package of 20 rods 3" length.

Tix Flux*: A liquid non-corrosive flux, harmless to hands or clothing. Compatible with most soft solders to increase fluidity. Washes away with water, even after drying.

Anti-Tix Flux*: A liquid mask that when brushed on will prevent solder flow to unwanted areas. May be used for hard or soft solders.

50-1163

| ITEM # | DESCRIPTION |
|---------|----------------------------|
| 50-1161 | TIX SOLDER PK/20 RODS 3" L |
| 50-1162 | TIX FLUX- 1/2 OZ. |

28. Batterns® Self Pickling Hard Soldering Flux

ANTI-TIX FLUX- 1/2 OZ.

Makes hard soldering as easy as soft soldering. Holds solder bits in place and preserves the color and temper of the material. Use on gold, silver and platinum.

| ITEM # | DESCRIPTION |
|---------|---------------------------|
| 50-1170 | BATTERNS® S/FLUX - 8 OZ. |
| 50-1171 | BATTERNS® S/FLUX - 16 OZ. |
| 50-1172 | BATTERNS® S/FLUX - 32 OZ. |

29. Stay Bright Soldering Kit

Slightly higher temperature bearing lead free solder, melts at 450°F. May be used with a soldering torch or gun. Use Stay Clean flux to achieve good flow characteristics. Kit includes $\frac{1}{2}$ oz. of solder and $\frac{1}{2}$ fl oz. of Stay Clean flux.

| ITEM # | DESCRIPTION |
|---------|---------------------------|
| 50-1191 | STAY BRIGHT KIT WITH FLUX |
| 50-1192 | STAY CLEAN FLUX ½ FL OZ. |

30. Handy® Flux

An economical long lasting paste flux that sustains prolonged heating. Contains fluoride, potassium and hydroxides. Widely used by silversmiths for soldering gold, silver, brass and non-ferrous metals.

| ITEM # | DESCRIPTION | |
|---------|------------------|--|
| 50-1181 | HANDY FLUX 8 OZ. | |
| 50-1182 | HANDY FLUX 1 LB | |
| 50-1183 | HANDY FLUX 5 LB | |

31. Dandix Paste Flux

A paste flux for low temperature soldering. Contains no fluoride and prevents discoloration or oxide buildup.

Apply with a brush where needed to assist solder flow.

| ITEM # | DESCRIPTION | |
|---------|--------------|----------|
| 50-1184 | DANDIX PASTE | 11/2 OZ. |
| 50-1185 | DANDIX PASTE | 8 OZ. |
| 50-1186 | DANDIX PASTE | 16 OZ. |

32. Cool Paste

Frequently used, non-toxic, non-asbestos paste for localized protection from heat damage during soldering and brazing.

Effective up to 2000°F.

Easily cleansed by water.

| ITEM # | DESCRIPTION | |
|---------|--------------------|--|
| 50-1187 | COOL PASTE - 4 OZ. | |

33. Cold Shield

A non-toxic, non-corrosive paste that protects stones, plastics, and precious metals from damage by heat while soldering or brazing. Withstands heat up to 3000°F. Cleans away easily with water.

| ITEM # | DESCRIPTION | |
|---------|-------------|------------|
| 50-1188 | COLD SHIELD | 16 OZ. JAR |
| 50-1189 | COLD SHIELD | 32 OZ. JAR |

34. Flux Dispenser

Pump Dispenser: Durable plastic bottle. Dispenses a limited amount of flux into a reservoir.

Needle Tip Dispenser: Eliminate the use of flux brushes by using this bottle dispenser. Spot dispensing puts the flux exactly where needed.

| ITEM # | DESCRIPTION |
|---------|----------------------------|
| 50-1154 | PUMP DISPENSER- 4 OZ |
| 50-1155 | NEEDLE TIP DISPENSER- 2 OZ |

35. Yellow Ochre

Mix with water or alcohol and use as a paste to prevent the flow of solder to unwanted areas.

| ITEM # | DESCRIPTION |
|---------|-----------------------|
| 50-1194 | YELLOW OCHRE - 1/2 LB |

36. Boric Acid Powder

Dissolve in denatured spirit, in a glass container, to make a liquid flux. Recommended for general soldering tasks. Keep covered as it evaporates easily.

| ITEM # | DESCRIPTION |
|---------|-------------|
| 50-1198 | 1½ LB JAR |

37. Borax® Powder

Makes paste by the addition of water. When applied, acts as a flux and allows solder to flow. Best used to line the insides of crucibles, as it helps extend crucible life.

| ITEM # | DESCRIPTION |
|---------|-------------|
| 50-1195 | POWDER CONE |
| 50-1196 | BORAX 1½ LB |

38. Red Sable Brushes

Pure sable hair bristles, crimped in ferrules, mounted in a convenient sized pencil grip. Extremely fine points, in assorted sizes for art and design work. Size 3/0 is smallest and #2 is the largest. Sold pk/12

SOLDERING

39. "Magic" Soldering Products

Magic Boric Acid Powder: High grade flux and deoxidizing agent. May be mixed with denatured alcohol to make a soldering flux.

50-2021

16 OZ.

Black Magic Non-Acid Pickle: Non acid soldering pickle. Will not be affected by steel tweezers. Comes in powder form. Just add water to use. Shipped in gallon container.

50-2024

16 OZ.

Magic Pickle: Dry granulated pickling compound for cleaning and removing oxidation and fire scale. Mix one tablespoon to one pint of water.

50-2027 16 OZ.

Magic Boric Soldering Dip: A ready to use water based compound. Articles are to be dipped prior to soldering. 50-2028 8 OZ.

Magic Flame: A multi purpose soldering compound. Add with equal parts of water to produce a gold or silver flux. May be used in paste form for a full strength flux.

50-2029

8 OZ.

Pure Magic Concentrate Powder: A powder concentrate to be mixed with water to make one quart. Dip articles in solution and torch clean before soldering.

50-2031

8 OZ.

40. Repair Solders - Cadmium Free

Solder in sheet form for the identical color match to the carat of the piece to be soldered. All free flowing to provide a strong permanent joint.

Available in three grades. Sold one dwt (1.555g).

Magnetic Polishing

The Complete Metalsmith

A handy bench reference that clearly explains shaping. The court we had decribe a containing from the by Tim McCreight inging, raising, mechanisms, casing and rendulation.

This easy-to-use book describes everything from the use of tools to metals and their properties. 61-1071 (Spiralbound - 150 pages)

1. Magnetic Finishers

Easily surpasses vibratory or centrifugal systems. Engineered from the finest materials, it is tough, sturdy and dependable. Part, size or shape are not a concern. A choice of different polishing media gives you the option for controlling the surface finish, be it satin or ultra bright. All models have see through bowls with fill line

indication and a cover.

Use wet media for pre-polish and dry media for a luster finish.

Features:

- A direct drive, fan cooled motor for quiet operation
- On/off switch and pilot light
- Programmable models allow you to do multiple runs, plan new parameters, or even make last minute changes
- · An end of cycle buzzer alerts you at the pre-set time

2. Eco-Mini Disc Finisher- "Dry"

The Eco Mini Dry finisher is capable of imparting an ultra shine to all precious metals including platinum. May also be used to restore the shine to hand finished or tarnished jewelry. Walnut media impregnated with polishing paste is the processing agent. Specifications:

- 3L capacity Power 50 w
- Dimensions: 220 Ø X 330 MM Ht. Weight 8 lbs.

Unit Includes:

- 12 hour timer
- · Walnut media Coarse (1 kg)
- · Walnut media- fine (1 kg)
- · Polishing paste P6 200g

3. Eco-Mini Disc Finisher- "Wet"

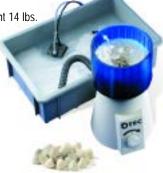

The Eco Mini Wet finisher is designed for wet grinding of rough unprocessed cast jewelry. Plastic grinding media is used as the processing agent. In addition the continuous through flow of water washes out the loose abrasives to generate a pre-polishing surface capable of imparting an ultra shine to all precious metals including platinum.

Specifications:

- 3L capacity Power 80 w
- Dimensions: 220 Ø X 350 MM Ht. Weight 14 lbs

Unit Includes:

- 12 hour timer
- · Plastic media (2.5 kg)
- · Burnishing Compound (1 Lt.)
- Pump and Tank

4. Eco-Maxi Disc Finisher OTEC

The Eco-Maxi disc finishing system is a modular unit that offers maximum flexibility.

One fully equipped base powers three different processing bowls, thereby making the machine adaptable to every application- magnetic polishing, wet grinding and dry polishing.

Achieve perfect results faster, without time-consuming hand finishing.

| BOWL | UNIT | MEDIA |

Wet / Dry Unit Features:

- · Variable speed control
- Quick release
- · Includes dosing pump and container
- Inner Ø 9"
- 52-1076/52-1077 • Wt: 11 lbs Wet Bowl
- · Wt: 5 lbs Dry Bowl

Magnetic Unit Features:

- Variable speed control
- · Auto left-right directional change
- Inner Ø 9"
- Wt: 10 lbs

Base Unit Features:

- · LC- Display for speed/time
- Variable speed control
- Quick release
- Automatic bowl recognition
- Auto left-right directional change
- Dimensions: 15" X 12" X 20"
- Wt: 55 lbs

5. Tumble- Vibe 5

- · A light duty tumbler, with a pre-set amplitude
- · Workpiece capacity 25 rings with media
- · Bowl diameter 8" (0.5 cu.ft)
- · Cannot be used with a flow through (FT).
- · Media: » Ceramic 5 lbs » Plastic 3 lbs » Dry Shine 1 lb

Wt. 6 lbs CE approved.

| ITEM # | DESCRIPTION |

Media capacities shown are approximate. The total media capacity and the actual media amounts will vary in direct proportion the to amount of parts being tumbled.

7. Adjusta- Vibe 18

- · Industrial duty tumbler for use with all types of media
- · Vibratory amplitude can be adjusted
- · Equipped with drain
- · Process metal parts for deburring or polishing
- Bowl diameter 12" (0.18 cu.ft.)
- · Can be used with a flow through (FT-20)
- Media : » Ceramic 32 lbs » Plastic 20 lbs » Dry Shine 11 lbs

Wt. 13 lbs CE approved.

- · Designed with a heavy duty drive and suspension system
- · Specifically for use with steel and stainless steel media
- · Bowl has a discharge port for easier unloading
- · Workpiece capacity 125 rings with media
- · Bowl diameter 14" (0.22 cu.ft.)
- · Can be used with a flow through (FT-20)
- · Media: » Ceramic » Plastic 13 lbs » Dry Shine 7 lbs » Steel Shot 50 lbs

Wt. 22 lbs CE approved.

SURFACE FINISHING

13. Mini Vibratory Tumbler

A top quality machine with innovative features for finishing small batches of parts. Perfect for deburring, smoothing and pre-polishing of jewelry. Easy to setup and maintain. Best suited for small batches of up to 8 rings. Bowl is an integral unit and has the desired resilience for maximum vibration.

Uses 2 lbs of mix steel shot media (not included).

Features:

- Timer in steps of 15 mins-max. 75min.
- Variable speed control
- · Fixed amplitude vibration

Specifications:

- Bowl 4.5"d. x 5.5"ht.
- Dimensions: 5" X 6.5" X 11.5"
- Wt: 7.5 lbs

| ITEM# | DESCRIPTION | |
|---------|----------------------|--|
| 52-1211 | MINI VT- 110V / 60HZ | |
| 52-1212 | MINI VT- 220V / 50HZ | |

14. Mini Magnetic Finisher

A compact mini finisher that is ideal for finishing small batches of articles. Use it to burnish and pre-polish intricate designed jewelry. Simple to operate. Just fill the bowl with media and jewelry items, set the speed and timer. Bowl capacity is for 6 rings.

Use 50g SS pin media (not included).

Features:

- Timer in steps of 15 mins-max. 75min.
- · Variable speed control
- End of cycle as audible signal
- Includes two bowls (wet and regular)

Specifications:

- Bowl 4.5"d. x 5.5"ht.
- Dimensions: 5" X 6.5" X 11.5"
- Wt: 6.5 lbs

Flow Thru Systems for Vibratory Tumbler

FT-20 for TV-10 & TV-18:

- An integrated system for automatic liquid flow
- · Keeps the media and parts cool and lubricated
- · Control panel has 0-6 hour timer

FT-75 for TD-75, AV-25SS, AV-40SS, AV-40 & AV-75

- · A flow thru design for compound rinsing
- · Keeps the media and parts cool and lubricated
- Allows metering of the solution up to 8 hours Please ask for details.

15. Rotary Tumbler- Programmable

Rotary Tumblers are stable well balanced units that are capable of processing larger work pieces with heavier media. Process times are longer than vibratory finishing, but a distinct advantage is that the surface of work pieces get work hardened. Barrels are multi sided, made of tough polycarbonate, are leak proof and will not corrode or rust. Use with all types of media including steel shot. Addition of burnishing compound and detergent keeps parts cool and avoids drag during tumbling. Features include variable speed, a programmable timer, forward/reverse and auto shut off with buzzer.

Rotary Tumbler- 1 Lt.

Rotary Tumbler- 2 Lt. - DIRECT DRIVE Dimensions: 10" x 10" x 14" Wt. 20 lbs

| 7 ¹ / ₂ " X 5 ¹ / ₂ " BOW | _Ø DIGITAL TIMER 2 L VARIABLE SPEED |

Recommendation:

For optimum performance fill the bowl to 50% of its capacity (parts and media)

16. Gems Rotary Tumbler

All steel construction, hexagonal rubber lined barrel with a leak proof cover. Belt driven by a continuous fan cooled motor. All rotating parts have permanently lubricated non-metallic bearings for efficient and quiet operation. Machine is complete with motor overload protection. All types of media including steel shot may be used. Slight wetting of burnishing media with detergent is recommended.

17. Steel Shot & Stainless Steel Shot

<u>Steel Shot (C.S):</u> Made of carbon steel in various shapes, but uniform in size. Fine shot is the ideal choice of media for burnishing. It is a proven fact that the addition of tumbling powder, moistened with burnishing compound, helps to prevent rust on the steel shot. The tempered steel shot will impart a uniform, scratch free, work hardened surface on all metals. After use, carbon steel shot must be rinsed clean and stored in a rust preventive solution.

<u>Stainless Steel Shot (S.S):</u> Unlike carbon steel, this media needs no rust protection. Heavier in weight and corrosion resistant, this shot may be safely used with acid soap solutions. Selection of the shape is determined by the form of the work pieces. Pins are the ideal choice for finishing intricate cavities and filigree. This media must be cleansed in water, then dried and stored.

18. Ceramic Media

Ceramic bonded aluminum oxide is the recommended break-in media for initial rough finishing on raw casting or hard metals. The heavy or medium cut is a reflection of the particle size of the abrasive.

Triangular media eliminates jamming and is designed to reach into grooves, corners or shallow contours.

Cylinder shapes with their gentle rolling motion may be used in a secondary operation to smooth the surface.

Keep the media moist during tumbling by adding a burnishing or a light soapy compound.

Sold bx/50 lb

| ITEM # | DESCRIPTION |
|---------|-------------------------------------|
| 52-1431 | - TRIANGLE - 3/8" X 1/4" GRAY |
| 52-1433 | - ANGLE CUT CYL - 3/8" X 5/16" GRAY |
| 52-1435 | TRI-STAR- 5/8" X 1/4" |

19. Plastic Media

Plastic bonded abrasive pellets are an excellent choice for providing a uniform finish on medium hard or soft metal. Improve surface finish gradually from coarse to fine.

Blue pyramids (fast cut) are best for the initial stage.

Green pyramids (general purpose) leave a smooth matte finish.

Lt. Green pyramids (smooth finish) will impart a high shine. Sold bx/50 lb

52-1412

| ITEM # | DIMENSI | ONS | | |
|---------|--------------|--------------|--------|--|
| 52-1410 | 1/4" - BLUE | -PYRAMIDS () | (V) | |
| 52-1412 | ¹/₄" - GREE | N-PYRAMIDS | (X) | |
| 52-1414 | ¹/₄" - LT.GR | REEN-PYRAMI | DS (V) | |
| 52-1416 | ¹/₂" - CYLIN | IDER WEDGE | | |
| 52-1418 | 9/16" - CON | E- X | | |

Guidelines for Surface Finishing: The acceptable media to part ratio is approximately 70% media to 30% parts. When running conventional media that require a wet process, be sure to have the correct amount of water and compound. Excess water will hamper the vibratory action thus giving less than the desired results. Media and compound should be just wet with no standing water. Use of a compound rinsing system will ensure proper dispensing of water and compound.

20. Porcelain Balls

This micro abrasive media will cut, clean and leave an extremely smooth

surface that is bright, but not reflective. Easier to maintain than steel shot, the tumbling action of this media will reach into small cavities without getting entrapped. Use with a soapy liquid detergent to generate improved surfaces.

A mix of ball sizes in a single charge will produce a more refined surface quality.

21. Steel Shot- Balls

Hardened polished balls may be used for very light deburring. Due to their minute size, a high degree of polish is achieved by a strong peening action. Recommended for use in rotary Tumbler with the addition of burnishing compound. A complement of mixed sizes will generate excellent results on almost all metals.

| TEM# | DESCRIPTION |
|---------|-------------|
| 52-1451 | 1.0MM- 200G |
| 52-1452 | 1.2MM- 200G |

| 52-1454 | 1.6MM- 200G |

22. Walnut Shell

Granulated walnut shell is a natural carrier for dry tumbling or barrel finishing operations. When charged with polishing oxides, either rouge or chrome, a surface of high luster is achieved.

| ITEM # | WEIGHT | |
|---------|--------|--|
| 52-1471 | 5 LBS | |
| 52-1473 | 50 LBS | |

Corn Cob

Finely ground corn cob is an ideal absorbent for drying articles of jewelry. Additionally, it removes water stains, finger prints, or residue left after tumbling with dry media.

| ITEM # | WEIGHT |
|---------|--------|
| 52-1481 | 5 LBS |
| 52-1483 | 50 LBS |

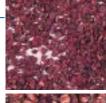

24. Dri- Shine

Dri- Shine I: A ready to use polishing agent made of pulverized walnut shell treated with red rouge. When run in excess of 5 hours in a vibratory tumbler this media provides excellent coloring characteristics

Dri- Shine VII: A nut based media for final polishing applications. This media will impart a tarnish free, superior bright luster on metals. Normal cycle times will be about 20-45 minutes depending on the application

25. SS Media Pins & Balls

These quality stainless steel pins and balls are used in magnetic finishers along with a small amount of mild detergent to assist in superior deburring and polishing operations. For delicate jewelry and sharp inside corners, use smaller sized pins. Accelerated finishing can be accomplished by adding up to 10% of balls with the media pins.

| 0 | DESCRIPTION | ITEM # |
|-----|--------------------|---------|
| | PIN 0.3 X 5MM 100G | 52-1490 |
| 15 | PIN 0.3 X 5MM 250G | 52-1491 |
| 700 | PIN 0.4 X 5MM 250G | 52-1492 |
| 12 | PIN 0.5 X 5MM 250G | 52-1493 |
| | PIN 0.6 X 5MM 250G | 52-1494 |
| | BALL 1.2MM 200G | 52-1495 |

Note: Do not store pins in the bowl on the machine. Doing so will cause the pins to magnetize, thus lessening their effectiveness. Discoloration of the pins is normal. Pins can be cleaned using tri-phosphate solution. TSP is available at any hardware store.

SURFACE FINISHING

27. Burnishing Compound- Powder

These Burnishing Compounds are non-hazardous and formulated for use with carbon steel shots in Rotary Tumblers. They may also be used with a flow thru system in a vibratory Tumbler.

Mixed 2-4 oz. per gallon of water.

#750: Contains a rust inhibitor to prevent carbon steel shots from oxidation.

#910: May be used during tumbling to enhance the finish of precious metals.

#950: Designed for giving a bright finish to platinum.

32. Blasting Media

Surface preparation is of vital importance before polishing, burnishing and plating. Surface roughness may be improved by blasting with media, either abrasives or glass beads. Different surface finishes may be generated

by varying the parameters of the micron size of abrasives and air pressure. The degree of matte to satin finish depends on the hardness of the material being finished.

| 54-1092 | HAND-HELD METAL DETECTOR |

6. Garrett® GTP 1350 Metal Detector

An affordable high performance mid range detector with microprocessor graphics target analyzer. Easy to operate by beginners and professionals. Includes continuous instant display system with (DSP) Digital Signal Processor. Target with pin point accuracy to a 20% greater depth than most other detectors. Features different modes, search aids, and settings.

Features:

- · Touchpad controls
- · Sensitivity/ Depth adjustment
- Scantrack
- · Adjustable frequency and volume
- · Graphic Target Analyzer
- · Graphic Target Profiling
- · Supported by manufacturer's warranty
- Detection Frequency: 7.2 kHz
- The GTP 1350 comes with the 7" X10' PROformance searchcoil and video
- Length 40-51" Wt. 4.0 lbs

Optional Searchcoils available

7. Precious Metal Tester

GK-300 is a high precision tester that easily determines the purity of all precious metals: gold, silver and platinum. A computer with installed software calculates the caratage and percentage based on the specific gravity of the sample.

GK-2000 is an advanced version of the GK300 with a capacity up to 2,100g. This is useful for measuring larger objects like ingots, etc. The GK -2000 calculates the purity of both gold, silver and platinum.

Unit Includes:

- · Senser · Water Tank · Holder · Support
- Machine Body
 AC Adapter
 Tweezers
- · Thermometer · Calibration weight

8. **PRESIDIUM** Diamond Testers

Professional, compact, sleek penlike instrument. Digital electronic circuitry consistently and reliably distinguishes between diamonds and simulant. Gives an audible continuous beep when diamond is tested. Comes in a vinyl pouch.

<u>Diamond Mate-A:</u> Operates on alkaline AAA batteries (not included). May be used with AC adapter.

| ITEM# | DIMENSIONS |
|---------|-------------------|
| 54-1131 | 160 X 30 X 20.5MM |

Multi Tester: The multi-tester distinguishes diamond from CZ and moissanite by the combined principle of thermal and electrical conductivity from patented technology. Features include a retractable probe that ensures accurate and consistent pressure, LED display and low battery indicator. Operates on 3 (AAA) alkaline batteries (not included).

| ITEM # | DIMENSIONS |
|---------|-------------------|
| 54-1134 | 160 X 30 X 20.5MM |

<u>Diamond Mate-C:</u> Operates on rechargeable NICAD batteries (not included). May be used with AC adapter.

| ITEM# | DIMENSIONS |
|---------|-------------------|
| 54-1132 | 160 X 30 X 20.5MM |

for more diamond testers see page #124

<u>Diamond Fact:</u> A professional top of the line tester. Instantly separates simulant from the genuine. Small compact pocket model has needle tip testing point for stones as small as 0.02 carat. Operates on two AA batteries (not included).

Distinguishes Diamond from simulated stones.

| ITEM # | DIMENSIONS |
|---------|----------------|
| 54-1135 | 92 X 22 X 68MM |

Moissanite Tester: Distinguishes diamond from moissanite. This tester is recommended for use after a positive testing result for diamond with a conductivity tester. Operates on 3 (AAA) alkaline batteries (not included).

| ITEM# | DIMENSIONS |
|---------|-----------------|
| 54-1133 | 160 X 21 X 30MM |

<u>Gem Tester:</u> The gem tester instantly separates diamond from all known simulants. A probe measures the rate of heat being conducted away from the stone. The gem tester can be used on mounted and unmounted stones as small as 0.0 2 carat. Comes complete with an AC adapter in a velvet lined box. Also operates on two AA batteries (not included).

| ITEM# | DIMENSIONS |
|---------|-----------------|
| 54-1136 | 180 X 96 X 72MM |

9. IKOHE Moissanite Tester

The revolutionary new tester that outsmarts and even detects moissanite, which is a simulant for diamond. Ultra sensitive, can check stones of 0.01 carat or less. Readings displayed on both sides allowing use in either hand.

Backed by manufacturer's warranty.

Separates synthetic moissanite from diamonds after testing with a conventional diamond tester. Flashing green light indicates that stone is moissanite or synthetic.

Operates on one 9V alkaline battery (included)

| ITEM # | DESCRIPTION |
|---------|--|
| 54-1137 | MOISSANITE TESTER - (Battery included) |

10. Diamond Scribe

An easy to use tool to determine if a stone is a diamond. Use the fine point to make a scratch across the stone. If a streak appears it is not a diamond. Retractable point for protection. Clips on to your pocket.

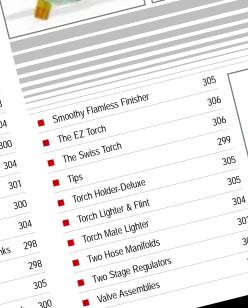

| ITEM # | DESCRIPTION |
|---------|----------------|

The Little Torch "

2. Kits with Regulator - For Disposable Tanks

Unmatched flexibility - these kits can be used with several fuels including acetylene, propane, MAPP *, or natural gas. It produces a perfectly controlled stable hot flame to melt weldable metals, glass and even ceramics

* Kit shown may be used with disposable MAPP* or propane and oxygen cylinders (Cylinders not included). Note: Disposable oxygen and fuel tanks may be purchased at hardware stores. Not to be used with LP multiflame (rosebud tip)

| ITEM # | DESCRIPTION |
|---------|---|
| 55-1021 | 23-1014 Includes pre-set oxygen regulator, preset propane regulator, cylinder holder, torch, size 5 tip, 8 ft. hoses and complete instruction manual. Allows maximum portability. (Tanks not included) |
| 55-1022 | 23-1003B Includes torch, #2-6 tips, acetylene regulator (for "B" tank). oxygen regulator, reverse flow check valves, 8' covered hoses and instruction manual. |
| 55-1023 | 23-1003P Kit with regulator for propane or industrial acetylene cylinders Includes torch, tips #3-7, fuel regulator, oxygen regulator, reverse flow check valve, 8' covered hoses and instruction manual. |
| 55-1024 | 23-1003 Kit with regulator for "MC" tank small acetylene (10 Cu. Ft. cylinder). Includes torch, tips #2-6, fuel regulator, oxygen regulator, check valves, 8' covered hoses and instruction manual. |
| | |

Disposable LP tanks are not included

3. Caddy Kits

Acetylene Caddy

Includes torch, #2-6 tips, acetylene regulator, oxygen regulator, and reverse flow check valves, 8' covered hoses, (20 cu. ft.) oxygen cylinder (empty), (10 cu. ft.) acetylene cylinder (empty), caddy carrier, tank wrench and instruction manual.

Oxygen and Acetylene cylinders can be filled at most welding supply stores.

Propane Caddy

Includes refillable propane tank (empty), (20 cu. ft.) oxygen tank (empty), torch with 8' (2.4m) covered hoses, #3-7 tips, oxygen regulator, propane regulator, reverse flow check valves, plated metal carrier and instruction manual.

| 55-1153 | PROPANE 5 LB | 9" HT. X 8" Ø | 6 LBS |

11. Two Hose Manifolds

Allows you to operate one or two torches from a single tank. Separate manifolds must be used for fuel and oxygen. Gas flow is controlled by individual needle valves.

| ITEM# | DESCRIPTION |
|---------|------------------|
| 55-1171 | FOR OXYGEN %" RH |
| 55-1172 | FOR FUEL %" LH |

13. Hose Connectors

Solid, one piece brass connections with nozzle to fit the respective hose size. Thread connections for fuel 55-and oxygen.

55-1178

| ITEM # | DESCRIPTION |
|---------|----------------------------------|
| 55-1176 | OXY RH - 9/16" FOR 1/4" ID. HOSE |
| 55-1178 | FUEL LH - %16" FOR 1/4" ID. HOSE |

Important Note for Gas Safety

- Consult your gas supplier before setting up the tank and torch system
- Ensure that the installation conforms to state and local regulations
- Secure fuel tanks to reduce risk of damage from falling or explosion
- Get professional help for all gas fittings and maintenance
- Purge fuel and oxygen lines and shut off main tanks daily after use
- · Always use eye protection and work in a well ventilated area

15. Acetylene Air Kit

A mid sized kit for all jewelry soldering, brazing, annealing and small melting jobs. No oxygen needed. Produces 1500°C flame temperature. Tank is not included, but is available separately.

55-1181 Kit includes torch handle, super fine tip NE180-00, 12½ of covered hose, regulator with gauge and lighter. (Tank not included)

55-1182 Silver Smith torch handle is for air/fuel use. Crafted in all metal construction with long wearing precision brass parts that are nickel plated for heat resistance and durability.

17. Smith Casting Melting Torch

Medium duty torches have silver brazed joints to provide overall strength and rigidity for safe performance under rugged conditions. UL listed. The torch body is made of nickel plated solid brass, with stainless steel ball valves for positive sealing and precision control. Torch handle WH100 is suitable for all heating and melting tips. Tip heads are made of solid copper. Multi flame rose bud tips are designed from heavy wall copper. It is recommended to use a flashback arrestor on the welding system. All items are to be ordered separately.

TORCHES

21. Harris Melting Kits

An ideal melting torch for large amounts of gold, silver and metal alloys but only small amounts of platinum. Heavy duty, all brass body, with a check valve safety feature to help prevent the reverse flow of gases. Leak proof valves for improved safety and reliability. Supplied with one large single orifice melting tip, tested and inspected. All torches are UL listed.

| ITEM# | DESCRIPTION |
|---------|----------------------|
| 55-1211 | HARRIS MELTING TORCH |
| 55-1212 | REPLACEMENT TIP #30N |

22. HOKE Type-Jewel Torch & Adapter Kits

A professional jeweler's torch for all soldering, brazing, welding and melting tasks. Each torch is made for a specific oxy-fuel combination. Forged solid brass body with seamless tubing, all nickel plated for long lasting service. Conveniently positioned finger tip control of valves for precision mixing of gases. Models with a pilot lamp allow a continuous flow of gas for instant ignition.

Adapter Tips: Tips are of special design to give a non-oxidizing flame for cleaner soldering and brazing.

Excellent for intricate work on chains, rings, pendants and delicate jewelry.

Not recommended for use with acetylene.

23. HydroGem

A state-of-the-art system. The HydroGem provides increased safety, as there is no stored gas. These machines use electricity to break down distilled water to create a clean fuel source. HydroGem comes complete with one torch and tip set, flexible hose, atomizer and necessary gauges. The needle tip torch flame may be used for soldering, brazing, welding or melting. Flame temperatures from 1500-3300°C. Working delivery pressure is low and the built-in flashback arrestor is designed to help stop any accidental burning of the gas back down the tube to the machine. Manufactured from the finest materials to stringent standards for long lasting service. Operating instructions are included. Meets all current CE requirements. Wt. 110 lbs.

| 55-1251 | HYDROGEM COMPLETE SET | |

24. Torch Mate Lighters

A convenient table top model widely used by professional jewelers. Battery (included). Add a torch mate holder for convenience.

| ITEM # | DESCRIPTION |
|---------|-------------------------------|
| 55-1287 | TORCH MATE LIGHTER |
| 55-1288 | TORCH MATE II BLACK |
| 55-1289 | TORCH MATE HOLDER FOR 55-1287 |
| 55-1290 | TORCH MATE HOLDER FOR 55-1288 |
| | |

25. Torch Lighter & Flint

A safer means to produce a quick spark, to ignite gas torches, without the hazard of an open flame.

| ITEM # | DESCRIPTION |
|---------|-----------------|
| 55-1261 | LIGHTER & FLINT |
| 55-1262 | FLINT BOX OF 12 |

26. Torch Holder-Deluxe

A universal positioning free standing torch holder to assist soldering operations.

| ITEM # | DESCRIPTION |
|---------|-------------------|
| 50-1023 | TORCH HOLDER ONLY |

Torch holder is to be used with third hand base 50-1021 see page #45

(Torch is not included)

27. Bench Torch Holders

Two types of torch holders, one clamps and the other screws on to the jeweler's workbench.

| ITEM# | DESCRIPTION |
|---------|-------------|
| 55-1292 | CLAMP TYPE |
| 55-1293 | SCREW TYPE |

28. Safety Goggles for Platinum

Light plastic wrap-around frames with safety colored lenses help protect eyes when melting metal, soldering or brazing.

| ITEM# | DESCRIPTION | SHADE |
|---------|----------------|-------|
| 45-1021 | SAFETY GOGGLES | 3A |
| 45-1022 | SAFETY GOGGLES | 4A |

| 45-1024 | SAFETY GOGGLES | 7A |
| 45-1025 | SAFETY GOGGLES | 10A |

29. Valve Assemblies

Replacement valve assemblies for the Little Torch. The green is for the oxygen port and the red is for the fuel port.

Do not interchange these assemblies.

| ITEM # | DESCRIPTION |
|---------|---------------------------|
| 55-1027 | OXYGEN VALVE - GREEN 7345 |
| 55-1028 | GAS VALVE - RED 7346 |

30. Magnetic Torch Stand

A metal weighted base with storage for tips #(2-7) and a magnetic mount to securely hold the Little Torch. (Torch and tips are not included)

| ITEM # | DESCRIPTION |
|---------|----------------------|
| 55-1291 | MAGNETIC TORCH STAND |

31. Butane Torches

Solid state, trigger ignition melter uses clean burning fuel for on-thespot work. Adjustable flame temperature up to 2500°F. Ideal for heating wax working tools and smoothing wax models. Unit may be refilled.

| ITEM # | DESCRIPTION |
|---------|---------------------|
| 55-1281 | 26 G FUEL |
| 55-1282 | 14 G FUEL |
| 55-1283 | BUTANE REFILL- 9 OZ |

32. Smoothy Flameless Wax Finisher

Pencil point torch of heated air. Ideal for blending uneven surfaces without actually touching the wax. Uses butane fuel. When the tip is removed it may be used as a mini torch for light soldering and repair work.

Temp. 2300°F/1260°C. UL listed.

TORCHES

33. The EZ Torch

The EZ Torch is a simple inexpensive torch for craftwork, general repair, soldering and annealing. The torch uses propane as fuel from a disposable or refillable tank and atmospheric oxygen. An adjustable valve replaces the more expensive gas regulator and delivers a perfectly controlled stable flame.

55-1231: Includes torch body and hose, three tips(55-1233/1234/1235) with valve for disposable propane tank. Tank to be ordered separately.

55-1232: Includes torch body and hose, three tips (55-1233/1234/1235) with valve for small refillable propane tank. Tank to be ordered separately.

| ITEM# | DESCRIPTION |
|---------|---|
| 55-1231 | EZ-TORCH KIT FOR DISPOSABLE PROPANE TANK |
| 55-1232 | EZ-TORCH KIT FOR SMALL REFILLABLE PROPANE TAKS |
| 55-1233 | SMALL TIP |
| 55-1234 | MEDIUM TIP |
| 55-1235 | LARGE TIP |
| 55-1238 | VALVE ASSEMBLY FOR DISPOSABLE PROPANE TANKS |
| 55-1239 | VALVE ASSEMBLY FOR SMALL REFILLABLE PROPANE TANKS |
| 55-1241 | EZ TORCH BODY ONLY |
| 55-1242 | REPLACEMENT HOSE |
| 55-1243 | REPLACEMENT KNOB |

34. The Swiss Torch

Manufactured in Switzerland. This torch similar to the hoke style is most popular with jewelers for its precision and versatility. The torch may be used for repair, microwelding and precise soldering. It is also a platinum torch, when used with a special tip it produces a hot flame for melting or casting small amounts of platinum. Brazing Tips: Provide excellent flame stability even with natural gases (except acetylene). Small pointed flame 4900°F-5160°F.

Microflame Welding & Brazing Tips: Extremely maneuverable flame, unlimited flame position. Adjustable pointed flame 4900°F-5160°F.

55-1298: Swiss Torch Set

(Torch body 55-1301 Hoke style head three tips 55-1310)

55-1299: Swiss Torch Set

(Torch body 55-1301 Microhead with four needle heads 55-1315)

4. Teflon Tweezers- Swiss

Top quality Swiss tweezers with teflon coated tips, particularly good for showing diamonds and handling precious gems. Length 61/2".

ITEM # TYPE 56-1181 TEFLON

5. Pearl Holding Tweezers

Made of carbon steel, nickel plated, with special shaped cup ends coated with teflon for protection while handling precious pearls. Length 61/2".

6. Ceramic Tweezers

High quality, non-magnetic, anti-static, light weight aluminum body tweezers. Indispensable when soldering or working with platinum jewelry.

7. Head & Shank Tweezers

Made of stainless steel with a serrated base and slide lock. Ideal for holding shanks and settings in position while soldering.

8. Solder Free Tweezers

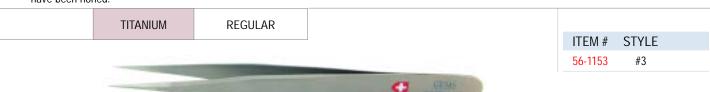

Swiss made, anti-magnetic, acid resistant tweezers that can be dipped in flux. Solder will not adhere to the ends.

9. General Purpose Tweezers

Stainless steel, non magnetic, satin finish tweezers for handling all miniature parts. They have tapered shanks, beveled edges and matched points that have been honed.

11. Cyber-therm Tweezers- Japan

Unique tungsten steel alloy withstands temperature up to 3000°C for 5-10 minutes. Handles protected by heat resistant rubber insulating sleeves.

12. General Purpose Tweezers- Value

Stainless steel, non magnetic, satin finish tweezers for handling all miniature parts. They have tapered shanks, beveled edges and matched points that have been honed.

13. Ring Holding Tweezers- Value

For Steam Tweezers see page #105

Secures rings from the inside to enable soldering of the shank ends. Also useful for holding two rings to solder.

14. Spring Grip Tweezers- Value

Spring grip brass tweezers are useful for sand blasting, pen plating and inspection. Made of solid brass with rubber coating. Points are bent to secure work.

Jewelry Wax Modeling Learn how to effectively use carving wax to by Adolfo Mattiello IKOhe matt f

express your ideas and create harmonious express your rueas and create narmonious designs. Jewelry modeling techniques are presented with progressive step-by-step presented with progressive step-by-step instructions and drawings of each model. instructions and urawings of each model.

Contains practical information on tools and Contains practical information on tools and stone setting, as well as creating your own templates. Provides answers to frequently asked questions. 61-1051 (Hardcover – 161 pages)

WAXES

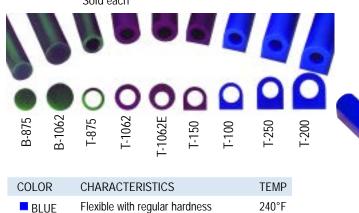

1. File-A-Wax® Wax Ring Tubes

The preferred wax for jewelry casters because clean burn out from molds is guaranteed. Convenient easy to use shapes to make models reproduced by the lost wax process. Ideal for creating designs as it can be routed, sawn or shaped by hand or machine. Available in three hardness grades. Can not be injected or steam dewaxed. Bars are 6" long.

15. Injection Waxes

These fine injection waxes are suitable for special applications according to their properties. All wax types have built-in release agents that are helpful for easy extraction.

Turquoise

A general purpose, tough, medium hard wax suitable for thin or thick sections. Self releasing from the mold. Injection Temp. 155°/68°C.

59-1151 50 LBS

Blue

A tough, hard wax that is ideally suited for molds with difficult draws. Easy clean extraction for intricate patterns. Injection Temp. 155°F/68°C.

59-1152 50 LBS

Aqua

suited for small to large molds. Inherent properties are

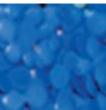

59-1153 50 LBS

A special feature of this medium hard wax is its fluidity that contributes towards excellent memory and readability. Injection Temp. 160°F/71°C.

59-1154

50 LBS

Magna -Blue

Similar characteristics as the turquoise, but the brighter hue allows for more clear definition. Tough with regular hardness. Injection Temp. 155°F/68°C.

59-1155

50 LBS

An all purpose medium hard tough wax that is well good for fine details. Injection Temp. 160°F/71°C.

Magna-Pink

A fast melting fluid specialty wax that combines hardness and toughness. Minimal shrinkage reproduces fine detail work. Injection Temp. 155°F/68°C

59-1156 50 LBS

Platinum- Lavendra

A low temperature injection wax of outstanding durability and strength. Good flow characteristics give crisp details. Formulated for extended shelf life. Minimal shrinkage with flexibility. Injection Temp. 160°F/71°C.

59-1161

50 LBS

Magna Stone Set - New

A highly fluid wax useful to meet the demands of castin-place stone set manufacture. Can be injected at pressures as low as 2 lbs. Fills the most intricate details and virtually eliminates mold lines. Injection Temp. 158°F/70°C

59-1165

Platinum- Light Green

Good fluidity and excellent reproduction. Injection Temp. 155°F/68°C.

| 59-1145 | WAX SHEETS- 3" X 6" X 3/6" |

CNC Machinable Waxes

Machinable • Carvable • Ideal for Checking Setups

Color Blue: Shore D Hardness 50

A highly cost efficient way to check setups on NC and CNC machines. This tough durable wax is also used to form fiberglass production tools for making jigs and fixtures and for a variety of prototype applications. Can be easily drilled, tapped, turned or milled without the need of cutting fluids. This product creates additional cost savings by extending tool life. Sold by the pound in blocks, bars and squares.

Call for specifications and prices.

The logical Alternatives to Expensive Prototype Injection Dies Color Red: Shore D Hardness 43

A uniquely machinable investment casting wax. Ideal for prototype work or short run part requirements. Allowing for cast metal shrinkage, the wax is machined as an exact duplicate of the desired part, then invested and melted out cleanly with virtually no residue. The cost savings are substantial because the need for injection dies is eliminated. Sold by the pound in blocks, bars and squares.

Call for specifications and prices.

WAXES

61. WAX-A-SIZER

Designed by a master jeweler the "WAX-A-SIZER" makes it easier to precisely size the bores of standard wax tubes. Unlike other sizers which tend to leave the bores tapered, the WAX-A-SIZER is unique as it has a pilot to guide the cutting head accurately. Made in aluminum the tool comes as a complete set with cutting heads calibrated from size #5 to #14. No more guess work. Select the right size and finish the bore. It takes less than 30 seconds to do the job.

TERMS & CONDITIONS

PRODUCT DESCRIPTION

All products listed in this catalog are specifically for use by Trade Professionals. The broad range of illustrations, specifications, and other related information are current as of the date of this printing. We will continue to offer the latest in technological improvement and there may be occasion that the part shipped will be a later revision of the cataloged product.

PLACING AN ORDER

Orders are welcome by Email, Fax, or Phone. Our qualified staff will make every effort to fill your order rapidly. Please be reminded that Orders for Special products and Non-stock items sometimes take additional time to process and ship. Because the number of new products that we offer continues to escalate, you will notice a new numbering system when identifying parts. Our courteous Sales staff is anxious to assist you wherever possible to locate the products of your choice.

SPECIAL ORDERS

To serve you better, we are receptive to providing products for special needs. Please be aware that special orders typically can not be cancelled and generally are not returnable. Thank you for your understanding.

PRICING POLICY

We have included prices for most of the products in our catalog. The prices mentioned therein may be used as a guide only. The company reserves the right to make changes in the price at any time. Prices may have changed since the publication of this catalog. All prices are NET F.O.B. All orders are subject to prices prevailing at the time of shipment. Suggested retail prices are in US\$. The prices do not include exchange fluctuations, freight/shipping charges, insurance, duties, taxes or other tariffs.

STANDARD PACKAGING QUANTITY

When products are sold in sets or standard quantities, orders received outside of the standard multiples will be adjusted to the next larger multiple.

SHIPMENT METHODS

Standard shipping will be by UPS unless otherwise noted on your order. The necessary information is the name of the contact individual, company, and the full shipping address including zip code. We remain available to ship using alternate carriers if noted on the order. We will continue to make every reasonable effort to package and ship products well, however we shall not be responsible for loss, damage, or delay due to causes beyond our control.

TRUCK SHIPMENT

Orders should spell out in detail the name of the individual, the company, full address including ZIP code. Orders without specific instructions will be shipped by UPS Ikohe will make every effort to ship the ordered merchandise promptly but shall not be held responsible for any loss or damage resulting from delay due to causes beyond our control.

HAZARDOUS MATERIAL SHIPPING

The Department of Transportation (DOT) governs the labeling, packaging, handling, and tracking of a variety of materials that are considered hazardous. In some cases, materials may not be permitted to ship in the same container. Our standard practice is to separate the HAZMAT materials from other products on your order to save you cost in shipping and to avoid problems with conformance to DOT standards. Understandably, these regulations result in extra costs during transit and are the responsibility of the customer.

DROP SHIPMENT

To accomplish this for you, please provide the drop ship company name, address including zip code, and contact individual's name if needed. Additional shipping, handling, and services will apply.

CLAIMS

When merchandise is transferred to the carrier, title automatically transfers to the buyer. For claims regarding shortages or damage, you must file with the carrier promptly to prevent loss. Should a shipment be delayed or lost in transit, please contact us and we will make every effort to track the shipment with the carrier.

RETURN MERCHANDISE

Before merchandise is returned, authorization must be obtained from our Sales Department. Merchandise to be returned is to be accompanied with the Return Authorization Number (RMA) included and also a copy of the applicable invoice. Returns are to be received undamaged, in original packaging, include all accessories, manuals, etc. Stock adjustment returns will not be accepted after three months from the invoice date. Products returned for warrantee and repair are to be according to the agreements established during the RMA process.
